ANNUAL REPORT

of the
STATE SUPERINTENDENT
UTAH STATE OFFICE OF EDUCATION

1984-1985
UTAH PUBLIC SCHOOL SYSTEM

THIRTEENTH ANNUAL REPORT
OF THE
SUPERINTENDENT OF PUBLIC INSTRUCTION
OF THE
STATE OF UTAH

For the Period Ending
June 30, 1985

THE STATE OF UTAH
OFFICE OF THE STATE SUPERINTENDENT OF PUBLIC INSTRUCTION

Salt Lake City, Utah 84111

Honorable
Norman H. Bangerter
Governor, State of Utah
State Capitol
Salt Lake City, Utah 84114

January, 1986

Dear Governor Bangerter,

Section 53-3-5 of the Utah Code requires me to present to you an annual report following the conclusion of each fiscal year. This report covers the period of July 1, 1984 to June 30, 1985.

I appreciate the opportunity of serving the people of this great state in the field of public education.

Sincerely yours,

Bernarr S. Furse
State Superintendent
of Public Instruction

SUPERINTENDENTS
UTAH TERRITORIAL SCHOOLS

Elias Smith, Superintendent of Primary Schools, 1851-1856.
William Willis, Superintendent of Common Schools, 1856-1862.
Robert L. Campbell, Superintendent of Common Schools, 1862-1874.
O. H. Riggs, Superintendent of District Schools, 1874-1877.
John T. Taylor, Superintendent of District Schools, 1877-1881.
L. John Nuttall, Superintendent of District Schools, 1881-1887.
P. L. Williams, Commissioner of Schools, 1887-1889.
Jacob S. Boreman, Commissioner of Schools, 1889-1894.
T. B. Lewis, Commissioner of Schools, 1894-1896.

UTAH STATE SUPERINTENDENTS

John R. Park, State Superintendent of Public Instruction, January, 1896 to September, 1900.

Mrs. Emma J. McVicker, State Superintendent of Public Instruction, October, 1900 to January, 1901.

A. C. Nelson, State Superintendent of Public Instruction, January, 1901 to December, 1913.

A. C. Matheson, State Superintendent of Public Instruction, January, 1913 to December, 1915.

E. G. Gowan, State Superintendent of Public Instruction, January, 1915 to July, 1919.

G. N. Child, State Superintendent of Public Instruction, July, 1919 to June, 1920.

George Thomas, State Superintendent of Public Instruction, January, 1921 to July, 1921.

C. N. Jensen, State Superintendent of Public Instruction, July, 1921 to January, 1933.

Charles H. Skidmore, State Superintendent of Public Instruction, January, 1933 to January, 1945.

E. Allen Bateman, State Superintendent of Public Instruction, January, 1945 to October, 1960.

Wilburn N. Ball, Acting State Superintendent of Public Instruction, October, 1960 to January, 1961; State Superintendent of Public. Instruction, January, 1961 to April, 1962.

Marsden B. Stokes, Acting State Superintendent of Public Instruction, April, 1962 to August, 1962.

Marion G. Merkley, State Superintendent of Public Instruction, August, 1962 to April, 1963.

Marsden B. Stokes, Acting State Superintendent of Public Instruction, April, 1963 to June, 1963.

T. H. Bell, State Superintendent of Public Instruction, June, 1963 to April, 1970.

Walter D. Talbot, State Superintendent of Public Instruction, April, 1970 to June, 1982.

Vaughn L. Hall, Acting State Superintendent of Public Instruction, April, 1982 to July, 1982.

G. Leland Burningham, State Superintendent of Public Instruction, July, 1982 to April, 1985.

Bernarr S. Furse, State Superintendent of Public Instruction, April, 1985, Incumbent.

PART I
GENERAL PROBLEMS AND RECOMMENDATIONS

BERNARR S. FURSE
State Superintendent of
Public Instruction

INTRODUCTION

Section 53-3-5 of the Utah Law requires the State Superintendent of Public Instruction to present annually to the Governor a report of the administration of the public school system. The report is to be presented following the close of each fiscal year and preceding each session of the Utah State Legislature. It offers specific information describing plans, problems, and accomplishments of the public education system and presents statistical data essential to an understanding of the system.

Fiscal 1985 was a year of major challenge and accomplishment for both the State Board of Education and the State Office of Education which serves as its staff. The momentum of Utah's comprehensive education reform effort was sustained through a leadership change in April when former Administrative Assistant and Legislative Liaison Bernarr S. Furse was appointed Acting Superintendent in April and a month later was sworn in as State Superintendent at the early retirement of Dr. G. Leland Burningham.

In 1984, Utah enrolled nearly 12,000 more students in its public schools than in the previous year, bringing the total enrollment of the state to over 390,000. Projections indicate that this trend will continue through 1990 when a total student population of approximately 500,000 is foreseen. Despite the nation's highest enrollment increases and a climate of recession and tax limitation, Utah ranks 50th in expenditures per student. At the same time, our students continue to rank at or above the national average academically, making our school system a model of productivity for the entire country.

EDUCATION REFORM

In 1984, the State Legislature gave Utah's school districts an unprecedented overall $93 million increase. An additional $250,000 was authorized for districts to promote educational excellence. Three new programs

to conserve future costs, use facilities more efficiently, and enhance student and teacher performance were added: $1,500,000 for Year-Round School; $500,000 for Outcome-Based Education; and $300,000 for Inservice Training.

During 84-85, much was accomplished to carry forward the following five action goals originally adopted in 83-84 by the State Board of Education to provide direction and focus for education reform:

CURRICULUM REFORM

The Board adopted a policy on new Core Curriculum and High School Graduation Requirements in January, 1984, setting in motion the massive task of developing standards and mastery criteria for competency at each grade level in all core subjects grades K-12. State Office staff visited all 40 school districts on five separate occasions to obtain input in the identification and refinement of the core standards. Field testing is taking place during 1985-86. Full implementation is expected to extend over the next several years.

The State Office of Education has accepted the monumental task assigned by the Board of identifying criterion-referenced tests for the core standards. The use of contract services is anticipated to accomplish this undertaking. The Office will continue the monitoring of educational performance statewide through the Utah Statewide Educational Assessment and Quality Indicators Program.

ENHANCING TEACHING AS A PROFESSION

The 1984-85 school year was the pilot year of Utah's Career Ladder Program for which the Legislature appropriated $15.2 million for 1984 and $17.9 million for 1985 for a total of $35.6 million. The first year of implementation allowed individualized programs for each district following State Board guidelines. Although this first year indicated the need for further refinements, local ownership and responsibility for the success of career ladders emerged because each district had designed its own program. Major improvements were made for the second year as districts borrowed successful practices from other districts. The conviction is growing that students will be the ultimate beneficiaries.

The enormous potential of career ladders as a catalyst for enhancing every aspect of excellence in our schools is becoming clear. Besides the improvement of student learning, career ladders are impacting curriculum development, teacher inservice training, the evaluation of teacher performance, administrators as instructional leaders, and local school boards as they seek long-range strategies to meet specific local needs.

The annual Spring Administrators Conference held early in 1985 was devoted to facilitating the understanding of Outcome-Based Education (OBE). By late summer when the annual Rural Schools Conference was held at Snow College in Ephraim, OBE had become Utah's most dramatic education success story, prompting both the Rural Schools Association and the Governor to honor specific schools for outstanding progress in student achievement.

Fiscal 1985 was the first year of the Utah Principals Academy, which received the enthusiasm of both district superintendents and principals who welcomed the opportunity to share their many concerns and interests. The

revamped teaching scholarship program also continued to aid and attract superior candidates into the teaching profession. Closer, more sustained cooperation is being established between teacher training institutions and hiring school districts.

VOCATIONAL/TECHNICAL EDUCATION AND REHABILITATION

A Vocational Education Master Plan has been adopted by the State Board for Vocational Education and the State Board of Regents that provides a definition of Vocational/Technical Education. This definition is now being used in the development of standards, program approval processes, and proposed changes in funding legislation. Custom-fit training and other efforts to strengthen the partnerships between businesses and industries are continuing. The Ogden-Weber Area Vocational Center dedicated its new campus in the spring of 1985. Work to define the vocational component of the core curriculum is continuing as are increased efforts to assist handicapped individuals to prepare for and obtain employment.

UTILIZATION OF PHYSICAL RESOURCES

Fiscal 1985 was the year of Utah's first year-round school, Westridge Elementary in Provo. Three additional schools in Provo, Alpine, and Davis districts opened their doors to year-round schedules in fall, 1985. Also, 40 schools in 12 districts applied for planning or development grants to prepare for year-round operation. Mounting evidence indicates that year-round school is a viable alternative not only for meeting the school building needs resulting from the state's dramatic enrollment increases but also as an aid to student retention of learning and extended employment for teachers.

PUBLIC AND PARENTAL DECISION MAKING

Increased efforts are being made toward more meaningful involvement of the public in school affairs. School patrons are working with teachers, administrators, and other school personnel in making the numerous decisions that affect the quality and effectiveness of the schools. School/community teams have been involved in the development and implementation of virtually every facet of educational reform. More attention must be given to the Student Education Plan (SEP). The State Board views this as a critical requirement to assure that a plan has been cooperatively developed for each student that meets his/her individual needs and career goals.

SATELLITE TELE-LEARNING

In summer, 1985, the Utah State Board of Education embarked upon a joint venture with Bonneville International Corporation to develop live interaction/accelerated learning of Spanish via satellite. The project is being piloted in 1985-86 at selected schools. The Board has also entered into a joint studies contract with IBM Corporation to provide computers and other equipment for telelearning and explore its ramifications for our whole school

system. Such collaboration of business entities and education has important implications for the future as we prepare our youth for citizenship in this complex information age.

EDUCATIONAL EQUITY COORDINATION

RICHARD GOMEZ

Administrator for
Educational Equity

Education is a principal means of increasing and developing the worth of an individual. An appropriate education for all persons is both a fundamental axiom of a democratic way of life and an effective instrument of social and economic progress. Educational Equity is far too important a matter to be left to chance, hopes or politics. The induction of all students into a larger U.S. society, and their preparation as effective, productive citizens is vital.

Through the Educational Equity Unit, the Utah State Office of Education assumes a leadership role in the educational thrust throughout the Utah school system to provide equitable, quality education to each and every student. It works to insure that no person on the basis of race, color, national origin, sex, religion, age, or handicap, is denied the benefits of equity for a quality education.

The Educational Equity Unit provides leadership and assistance to local school districts, school patrons, community organizations, and other educational constituencies on educational equity, multicultural education, human relations, Indian education, Title IX, Section 504, and affirmative action.

Through the Utah State Office of Education Title IV CRA grants, the Unit, on requests from local school districts, provides activities which deal with technical assistance, development and dissemination of materials, facilitation of involvement among various communities, and the provision of inservice workshops and presentations to better prepare the education community to deal with the educational equity thrust of the Utah State Board of Education.

One of the primary objectives this past year has been to encourage the local school districts, institutions of higher learning, and the parent community to work as coalitions to develop more effective networks in the development and delivery of educational programs and services to the underrepresented student minorities and their parents. Programs that have evolved from this effort include:

MULTICULTURAL EDUCATION

Multicultural Core Curriculum Infusion Pilot Test Project

As a result of the formation of a coalition of minority educators from the Utah State Board Minority Advisory Committees and the Utah Asian Association, great interest was generated to multiculturally infuse the recently re-

vised Utah Core Curriculum. The state Core Curriculum Committee and the Utah State Board of Education approved funding and staff participation in the development of a Multicultural Infusion Pilot Test Program to run concurrent with the 1985-86 Field Test of the Utah Revised Core Curriculum. The pilot test program is located in the Parkview Elementary School SLC School District, and Hillside, Farnsworth and Woodstock schools, in the Granite School District. Materials and teaching strategies from this program will be available for statewide dissemination for the 1986-1987 school year.

One set of materials is ready as a followup to the Indian Maps and Charts that were disseminated to all district school libraries last year. Under the direction of the State Board of Education, Wil Numkena monitored and assisted in the development of the Teacher Guide that integrates these materials into the appropriate Core Curriculum Standards and Objectives.

Computerized Multicultural Cross-Referenced Materials Bank

The Educational Equity Unit has purchased and modified a library cross-referencing computer software program that is being used to store the annotated reference information of multicultural teaching materials and the Core Curriculum Standards and Objectives with which they can be most appropriately used. This computerized system will also link the existing local school district multicultural libraries, thus providing an expanded resource bank for school teachers.

Computerized Multicultural Performing Artists/Presenters Bank

The Educational Equity Unit, in cooperation with the Utah Arts Council, the Musician's Union, and other performing artist resource contacts, solicited the applications from over 200 performing artists and presenters that indicated an interest in utilizing their skills to multiculturally enrich school curriculum programs. This information has been and will continue to be programmed into the computer bank so as to facilitate access by educators upon request. Efforts are continuing by the Educational Equity Unit and the Curriculum and Instruction International Education Program Director to build and computerize the Utah State Office of Education Artifacts Library so that those materials and the performing artists and presenters information become a Core Curriculum Standards and Objectives supplement resource for educators.

MESA (MATH, ENGINEERING, SCIENCE ACHIEVEMENT)

The MESA project is designed to increase the number of underrepresented minorities in the mathematics, engineering, and physical science-related professions. The program's goals are to: a) encourage students to acquire the academic skills they need to major in mathematics, engineering, and the physical sciences; b) promote career awareness so that participating students may learn of opportunities in the mathematics and science-related professions; and c) institutionalize educational enrichment activities that prepare minority students for engineering and other math-based careers. Students selected must have expressed an interest in mathematics and science-related careers and complete college preparatory math courses. Activities include: The MESA class which introduces students to different

fields within engineering: a Summer Enrichment Program and Academic and Career Counseling sessions. This program was initiated in Utah as a result of a coalition effort of the Utah State Board of Education, Utah State Office of Education, Granite School District, University of Utah, and private sector businesses and agencies.

CONTRIBUTIONS OF WOMEN

Women's Contributions to Utah Multicultural History

A specialized loan library which is being currently computerized has been developed for use by educators and the public. This library and curriculum items being developed provide educators with resources to meet the requirements of the revised Core Curriculum. A movie on women's contributions is being developed for this same objective.

Women Educational Administrators Network

A network has been developed among Utah Women Educational Administrators employed by local school districts and the State Office of Education to assist in promoting qualified women educators as administrators and to share their techniques and experiences.

SCHOOL FINANCE AND BUSINESS

ARTHUR L. BISHOP

Administrative Assistant
for School Finance and
Business

During 1984-85, the School Finance and Business Section functioned under direct jurisdiction of the State Superintendent to provide leadership, coordination, and general supervision to school districts and state government in (1) School Finance, (2) School Facility Planning, Review and Approval Services, (3) Student Transportation Services, (4) State and Federal Reporting, and (5) other school finance and business services, including school lunch auditing and legislative research.

School Finance Unit

The following major services were provided by the School Finance Unit:

1. Approximately $650,000,000 in state and federal funds were distributed to Utah school districts and certain state institutions.
2. Leadership, coordination, and supervision of school districts were provided in the following areas:
   (1) Budget preparation
   (2) Accounting
   (3) Auditing
   (4) Reporting
   (5) Program compliance reviews
   (6) Other areas of school finance
3. Instructional conferences and training workshops were conducted for school district personnel.
4. Financial data for school districts, the legislature, and other interested groups and individuals were analyzed and disseminated.
5. Leadership was provided in finance formula development and legislation.
6. Periodic audits of Child Nutrition Programs were performed.

School Plant Planning Unit

The School Plant Planning unit administered the allocation and distribution of Continuing and Critical State School Building Aid involving over half the school districts in the state. Facility planning, review, and approval services were provided to school districts to help them meet statutory and policy

PART I
GENERAL PROBLEMS AND RECOMMENDATIONS

regulations relative to school plant construction. School plant property accounting records were analyzed and maintained.

A report on school buildings in Utah was made current to January 1, 1985 and critical school building needs were determined.

Consultant services and information were provided to school districts in the state, the State Board of Education and staff, the Legislature, and other public and private agencies on energy conservation, workshops, school buildings including utilization, school building finance, school plant planning, and alternatives to new construction. About 55 school building projects were reviewed.

Pupil Transportation Unit

The Pupil Transportation Unit worked closely with public safety enforcement agencies, the highway safety section, the Utah Highway Department, local school districts, local agencies, PTA and public patrons. This section was engaged in the following activities:

1. Planning and organizing statewide training programs for school bus operation in the state.
2. Developing guidelines for school bus drivers and safe operation of buses and other vehicles; providing instruction for riding school buses; and supervising the operation of pupil transportation systems in school districts.
3. Assisting school districts in:
   (1) Surveys
   (2) Evaluation
   (3) Maintenance Operations
   (4) Organization
   (5) Planning
   (6) Forecasting
   (7) Budgeting in pupil transportation
4. Implementing a statewide information system for pupil transportation, statistics, cost accounting data, accident data, bus inventory, and financial information.

State and Federal Reporting Unit

The unit:

1. Coordinated the forms, collection, and dissemination of necessary data required for the State-Supported Minimum School Program, state and federal reports, budgets, and legislation.
2. Assisted in providing a data acquisition calendar and coordinated with data processing and the Education Data Acquisition Advisory Committee in coordinating data forms and collection of necessary data.
3. Developed standards and procedures for student accounting and other essential data for the Minimum School Program.
4. Analyzed, summarized, and disseminated meaningful data; completed state and federal reports; published annual bulletins and brochures.
5. Participated in training workshops and program reviews with local school districts.

PART II
OFFICE OF AGENCY AND REHABILITATION SERVICES

DARYL J. MC CARTY

Associate Superintendent

The Office of Agency and Rehabilitation Services had jurisdiction over the Internal Services Section, Personnel Services Section, Division of Rehabilitation Services, Division of Services for the Visually Handicapped, and the Utah Schools for the Deaf and the Blind, and the Child Nutrition Section during 1985.

INTERNAL SERVICES SECTION

The Internal Services Section provided internal accounting services including financial budgeting, accounting, and reporting for the entire State Office of Education — a composite activity of analyzing, recording, summarizing, and interpreting every financial transaction affecting the Agency and serving as fiscal liaison for the Agency with all federal, state, and private enterprises.

PERSONNEL SERVICES SECTION

The Personnel Services Section has been successful in the planning, design and implementation of several major goals for the past year. These include the abolishment of all obsolete personnel policies and procedures, and the writing of a new Internal Personnel Policies and Procedures Manual.

Other completed goals include the design and implementation of a new computerized personnel management information system, a standardized performance review date for all employees, and the implementation of proper job classification specifications for the Division of Rehabilitation Services and the Information and Instructional Systems Section in connection with reorganization.

Various Human Resource Management Services and activities have been provided on a continuous basis throughout the year. These include appli-

cant and employee counseling, recruitment and selection of new staff, administration of compensation and fringe benefits, job classification, personnel record management, settlement of all complaints and grievances, and many other specialized services.

DIVISION OF REHABILITATION SERVICES

The Vocational Rehabilitation Program in the State of Utah is a state/federal partnership. The State Board of Education is the sole state agency having the legal authority for the administration and supervision of the Utah State Program for Vocational Rehabilitation Services.

The main thrust of the Division of Rehabilitation Services (DRS) is to work with individuals who have physical, mental or emotional disabilities which impair their ability to secure or hold employment and for whom vocational rehabilitation services can offer competitive employability.

Since its inception, the program has been regarded as one of the most successful programs in helping handicapped people become independent. It is not only seen as a humanitarian program, but as a cost effective investment in handicapped people.

The Vocational Rehabilitation program has proven itself over the years. Two of its many accomplishments are the annual savings in public welfare payments and annual increase in tax revenue generated from the employment of handicapped individuals. Statistics show that the rehabilitation of clients will return to the government ten dollars in benefits for every dollar expended by the Vocational Rehabilitation Program.

In order to maintain a viable, cost-effective program, the Division of Rehabilitation Services has stressed, as a top priority, management effectiveness and the capability to sustain momentum of the delivery of services to the handicapped population in the State of Utah. During Fiscal Year 1985, the Division served 16,588 clients, of which 2,997 completed their rehabilitation programs and were closed as gainfully employed. Of these employed, 50 percent were severly disabled; 20 to 25 percent were removed from public welfare rolls.

Numerous other activities were carried on as part of the overall program of services. These additional activities were:

Independent Living Rehabilitation Services

Since 1981, the Division of Rehabilitation Services has been involved in the development of Independent Living Rehabilitation Services. The purpose of this program is to increase the ability of severely disabled individuals to function independently. The independent living program is divided into two major parts: the development and operation of an independent living center, and services to individuals. The Division of Rehabilitation Services has worked cooperatively with the Utah Independent Living Center, Inc. of Salt Lake in developing a center that provides independent living services.

In addition, DRS is in the process of developing an independent living center for the hearing impaired at the Utah Center for the Deaf. Fiscal year 1985 also marked the first year that funds were available to provide independent living services to individuals. As a result, DRS is in the process of developing and implementing rehabilitation services for the severely disabled

that are not eligible for the regular vocational rehabilitation program because of the severity of their handicap.

Rehabilitation Service Center

The Rehabilitation Service Center (RSC) was established to assist handicapped individuals and rehabilitation counselors in developing and carrying out individualized rehabilitation programs. Special emphasis at the Center has been placed on serving the severely disabled, with the ultimate goal of helping them achieve competitive employment. During 1985, the RSC provided the following services:

	Number Served
Vocational Evaluation	1,009
Psychological Services	788
Information and Referral	1,400
Employment Readiness Training	295
Job Placements	433
Rehabilitation Engineering and Technology	242

Transition

Developing and implementing a transition process to ensure that the needs of handicapped individuals are met and that a smooth transition takes place between agencies or services has been a goal at both the national and state level. Activities associated with this goal have included: developing a transitional team at the Utah State Office of Education which includes Vocational Rehabilitation, Special Education, Vocational Education, and Services for the Visually Handicapped; sponsoring a statewide conference on transition; developing regional transition committees to address local transition problems; seeking a supported employment grant; and initiating pilot projects with selected school districts to develop and demonstrate the transitional process.

Projects with Industry (PWI)

The Division of Rehabilitation Services, IBM, Salt Lake Skills Center, and a local Business Advisory Committee have developed a Computer Programmer Training Program for severely disabled individuals. The Division of Rehabilitation Services is responsible for identifying students, referring them to the program, and maintaining support services. The Salt Lake Skills Center provides the training and administers the day-to-day operation of the program. The Business Advisory Committee has been responsible for developing the curriculum, screening applicants, evaluating student progress, and developing internships and placements. This cooperative effort has provided a unique approach to solving the problems of the severely disabled. Last year eleven students graduated from the program, with ten being placed as computer programmers in businesses throughout the Wasatch Front. An additional ten severely disabled students are undergoing training at the present time.

A second PWI program involves the Maurice Warshaw Foundation for Employment of the Handicapped and the Division of Rehabilitation Services. In this program, the Warshaw Foundation works directly with employers in promoting employment of the handicapped and placing DRS clients in jobs.

This year, 175 handicapped individuals will obtain employment through the assistance of this program.

Inservice Training

Orientation training was provided to new staff members. Inservice training was conducted on numerous subjects determined by individual training needs assessment, program evaluation, and agency priorities in accordance with individual employee personal development objectives. Special training emphasis was placed upon utilization of computers, job placement, serving the severely disabled, transition, the utilizaton of community resources, secretarial training, and rehabilitation supervision.

Training was provided for several student interns from various university counselor training programs. In addition, training materials were developed and acquired for use in inservice training including continued development of a Division library. The Division spearheaded the Fifth Annual Conference of Agencies and Organizations Serving Disabled Persons.

Deaf/Hearing-Impaired

Services to the deaf/hearing-impaired are provided to eligible clients through traditional vocational rehabilitation services specifically oriented for these individuals. Additionally, services for the deaf/hearing-impaired include: independent living training, telecommunications/assistive devices, information and referral, coordination and provision of interpreter services, and a special project designed to identify and coordinate services for deaf-blind persons.

The Comprehensive Community Center for the Deaf/Hearing-Impaired located at 388 North 400 East in Bountiful, Utah, houses many of the above-mentioned programs, assisting deaf/hearing-impaired individuals to deal more effectively with the problems they encounter in daily living due to the unique implications of their disability. Additionally, the Center affords housing for the many organizations of and for the deaf/hearing-impaired.

During 1984, over 4500 individuals received specialized services designed to assist them in maximizing their vocational potential and their quality of living in Utah.

Disability Determination Services

The Disability Determination Services (DDS) in Utah adjudicates all disability claims in Utah under Title II and Title XVI of the Social Security Act.

The Social Security Act was originally passed by Congress 50 years ago to provide a source of income for workers too old to work. Many people were unable to work due to disability and this was a devastating loss, since most of the disabled people were not yet eligible to receive Social Security benefits because of old age. In 1954, the Social Security Act was amended to create a disability freeze program which froze eligibility for benefits until 62 or 65 for disabled workers. The state Disability Determination Services made these first medical determinations of disability. From that time until the present, categories of people covered under disability programs and benefits have been progressively expanded. New regulations put into place "state-of-the-art" determination of disability.

A decision as to whether a person is disabled is made by a physician and disability evaluation specialist considering medical evidence, as well as other related factors. In Fiscal Year 1985, the DDS will adjudicate approxi-

mately 8,000 claims. Each disability examiner has an average caseload of about 100 cases and adjudicates approximately three cases per day. Each claim that is allowed averages disability benefits of approximately $70,000 over the life of the disability claim.

About 1980, the federal government recognized Social Security Trust Funds were being paid to some people not disabled. This finding necessitated an increase in review of cases where people were receiving benefits. These continuing disability investigations caused some problems because of the number of people terminated and the lack of understanding by the public of what was being done. Some significant changes have been made for continuing disability reviews. A key provision in the new law now employs a "medical improvement standard" for reviewing continuing eligibility for disability benefits.

In the past 28-year history of the Disability Program, there have been continual changes which insure that the needs of society and the disabled will be met. Public Law 98.460 requires a revision of the way claimants with mental impairments are evaluated beginning this year. There is also greater emphasis of the need for well-documented cases and for using the latest in advances in diagnostic assessment. The program has experienced tremendous growth, and now over 18 billion dollars a year is paid out in disability benefits, from only 3 billion 15 years ago.

DIVISION OF SERVICES FOR THE VISUALLY HANDICAPPED

The Division of Services for the Visually Handicapped (DSVH) contains six specialized programs designed to meet the needs of blind and severely visually handicapped individuals of all ages.

Two of the programs directed at individuals of employment age are partially funded with federal funds. These programs are Vocational Rehabilitation and the Business Enterprise Program for the Blind. The remaining four programs are state-funded. The Utah Industries for the Blind provides full-time employment and employment-related services to blind and visually handicapped individuals. It is a production business which produces finished goods from raw materials and does a variety of packaging tasks for private industry.

The Training & Adjustment Services provides special skills to individuals in classes held at the Murray B. Allen Center for the Blind and in the client's home.

The Sight Conservation Services is responsible for screening for visual problems and education in this area. It also operates a Low Vision Lens Clinic in which certain clients are provided special aids to help them obtain maximum usefulness from small amounts of residual vision.

The programs operate in close cooperation with each other and help provide Utahns with a basic, well-rounded, specialized program for the blind.

A brief description of the various program activities follows:

VOCATIONAL REHABILITATION PROGRAM

The history of the federal-state vocational rehabilitation program began with the passage of the Smith-Fess Act, which was signed by President Wilson on June 2, 1920. the legal basis for creating individual rehabilitation programs for the blind, separate from all other disabilities, is the

Barden-LaFollette Act (P.L. 113-78) which was signed by President Roosevelt on July 6, 1943. The Utah State Board of Education made the decision to separate the blind rehabilitation program from the Division of Rehabilitation Services and to place it with related service programs under the Division of Services for the Visually Handicapped, effective January, 1977.

The purpose of the Division's vocational rehabilitation program is to assist individuals with visual disabilities to prepare for, obtain, and maintain employment and various non-remunerative occupations. This is accomplished through individualized programs with such services as diagnostic evaluation, counseling and guidance, mental and physical restoration (inclusive of eye surgeries and appliances), training, job placement and post-employment services.

During the past year, the rehabilitation program has accomplished a number of significant goals, such as the establishment of a Cedar City Office in order to provide services for individuals living in Central-Southern Utah; installation, programming, and initiation of a computerized data system; new management policies geared at stream-lining the program for more rapid and beneficial client services; additional federal funds for program expansion; initiation of a statewide public awareness program; the first phase of planning for a statewide needs assessment study; and service provision for 404 visually handicapped individuals, of which 100 percent of the visually handicapped Utahns who were classified "severely disabled" were rehabilitated.

BUSINESS ENTERPRISE PROGRAM

The authority to operate vending facilities for the blind began with the Randolph-Sheppard Vending Stand Act in 1936. In 1946, approval was received to operate the program here in Utah.

The two major purposes of the Business Enterprise Program (BEP) are to provide self-employment opportunities for visually handicapped people in a small business setting, and to provide a quality service to our customers. The visually handicapped people that we work with are those who have the desire and ability to operate their own business. The large majority of the BEP locations are in the area of food service.

The past year has been a good year for the BEP. The BEP team has worked hard during this time to improve the effectiveness of the overall program. A marginal location was eliminated and a very profitable location was added to the locations under BEP supervision. In addition to a new location, we are anxious to complete a major relocation and remodeling project. Five new operators were added to the program during the year. A formal training class was held and in-service training was held in the areas of taxes and sanitation. The overall rating of the health inspections has improved significantly. For some time, the operators have wanted to be able to participate in a health insurance program. This finally became a reality this year and a majority of the operators have taken advantage of this opportunity.

During the 1984-85 state year, the gross sales of the BEP were $719,315. The net proceeds retained by the operators were $136,237. There are 18 operators in the program and their average income was $7,568. Each of these figures is a definite increase over last year. We appreciate the support of the customers and the work of the operators.

The BEP continues to work with federal, state and local government officials, and private businesses to provide valuable services to the employees and their visitors in each building.

During the coming year, we plan to open at least two new locations and to see the overall quality of the program increase.

TRAINING & ADJUSTMENT SERVICES

The purpose of Training & Adjustment Services is to deliver the most appropriate and necessary individual services to net less than 70% of the approximately 4,000 registered clients. Approximately 50% of these require and receive extensive casework services, training in adjustment skills, psychological and social reorientation, and provisions of special equipment and techniques. The needs of this target group, as recognized by them and by the Agency, require professional service plus non-professional support, materials, equipment, and facilities. These provisions will reduce their dependency needs, increase their level of self-esteem, and lessen their demand on family and community.

Direct contacts were made and services given to more than 2,500 blind and visually handicapped residents of the State of Utah. Four hundred fifty clients were processed for registration and assigned to appropriate caseloads in compliance with Utah law.

Curriculum and service procedures have been consistently updated to achieve improved quality and efficiency to ensure that clients have an opportunity to develop those skills necessary to deal effectively with the problems of visual loss. More than 2,000 clients have been provided educational or casework services in their own homes. A primary thrust has been to emphasize the teaching of such basic skills as communication, mobility, and self-care to all clients according to their individual needs. This also includes the elderly.

Nine short-term training courses for blind and visually handicapped persons were provided in selected areas. Comprehensive field services were offered in all counties of the state. Two 16-week intensive training sessions were conducted to provide 34 new clients instruction in basic skills required to cope with blindness and prepare for vocational training and placement. A successful three-week program in independent living for teenage clients was conducted at the Salt Lake Center. Some of these students lived in the dormitory.

More than 100 presentations and seminars were held to promote favorable attitudes toward blind and visually handicapped persons and their educational, social, and employment potentials. All members of the staff are involved in providing information in answer to questions asked by the public and clients.

Efforts are being made to establish curriculum and provide staff to meet the special needs of more than 200 blind persons who are also deaf or severely hard-of-hearing.

An inventory of approximately 3,000 pieces of sound reproducing equipment, provided by the Library of Congress to clients in compliance with P.L. 89-522, is maintained, through which more than half of our clients are provided, free of charge, the equipment needed to reproduce sound-recorded books and magazines. The "talking book" service is entirely free to the client.

This program has maintained social work liaison with approximately 120 nursing homes and care centers to provide advocacy and assure proper care for blind and visually handicapped residents. Specialized assistance in location of housing, marital adjustment, financial adjustment, and personal adjustment to more than 100 clients is provided by qualified social workers.

The Program also offered the vital service of mobility and orientation training to at least 200 selected blind or visually handicapped youths and adults. In many communities throughout the state, the staff displayed and demonstrated specialized educational, vocational, and recreational equipment, including the talking computer.

UTAH INDUSTRIES FOR THE BLIND

For over 76 years, there has been an organized program to provide work for the blind and visually impaired of Utah. Today, this work program is Utah Industries for the Blind (UIB), a program which exists to provide employment, evaluation, and skill training in order to improve the skills, abilities, and conditions of life for the blind and visually impaired for which no other program exists.

From its humble beginnings in 1909, UIB has grown to its current level of employment. In Fiscal Year 1985, it provided extended employment to 35 people and transitional employment to 27 people. In addition, of these employees, two people were served with Work Adjustment Programs and 15 people were evaluated by the Evaluation Unit.

To support 77 employees, UIB has had to aggressively market its products. During Fiscal Year 1985, all previous sales records were broken. Total sales were $534,000 an increase of 13.5 percent over Fiscal Year 1984. However, not all types of work achieved the desired levels. Specifically, subcontract services were substantially slower than hoped for. To offset this situation for Fiscal Year 1986 and beyond, UIB has developed a Marketing Department and we are currently equipping and training personnel to market blind-made products and services.

In order to do business and employ blind workers, UIB has to incur expenses as does any other business. An analysis of Fiscal Year 1985 fiscal performance indicates a loss in business operations of $46,466. In analyzing this year's loss, two main factors are apparent:

- All extended employees are eligible for a full state employee benefit package. These benefits alone cost UIB in excess of $114,000 annually.
- High wage subsidy payments [$9,270 in 1985]. This is due to the fact that our employment guidelines indicate that we accept people who can produce [or have a reasonable expectation to] at 40 percent, yet our floor wage is $1.71 per hour or 51 percent of normal.

In order for UIB to be more responsive to both client [employee] and customer needs, two primary facility needs must be addressed. The first is a need for space. Current employment and production levels utilize all available production space. If additional employees or production items are to be added, additional space will be required. Secondly, a mechanism needs to be implemented to obtain funding to offset the inordinately high benefit costs incurred at UIB. Addressing these needs will allow for further improvement in both services and productivity.

The future for UIB operations looks good. Additional sales can be secured in the sub-contract area, in federal sales, as well as in general product sales. Additional sales will enable UIB to expand its workforce (for the severely-disabled, multi-handicapped blind, as well as higher functioning potential employees) and to raise wages.

SIGHT CONSERVATION/LOW VISION LENS SERVICE

A primary purpose of the Sight Conservation Program is to prevent or correct unnecessary visual impairment among preschool children. Utah has 77,601 youngsters, four through five-years-of age, who made up our target population in 1985. During the past school year, 52,781 (68 percent) of these preschoolers were visually screened largely by PTA volunteers who are trained by our staff. The 1,589 children who could not pass the visual test were referred for family followup. Of these, 100 had amblyopia or "lazy eye" which can be easily corrected at this early age, otherwise it causes blindness in the "lazy" eye. Another 273 received corrective prescriptions.

A continuing weakness in this project was the lower response rate of prekindergarteners at 44 percent of the total last year. Only 17,779 four to five-year-old children were screened. In spite of the Pre-school Vision Screening Law (H.B. 328), approximately 22,221 four-year-olds did not attend these statewide vision screening projects. One cause was the lack of local support for these important pre-school amblyopia detection projects by some local school administrators. Another unprecendented weakness surfaced this year. It was a 10 percent drop in the accuracy of the screening — from 80 percent to 70 percent. The 223 unnecessary referrals for further follow-up indicated laxity in maintaining vision screening standards. Corrective measures have been taken to upgrade this reliability.

An integral part of our Utah amblyopia detection program is health education. The Division of Services for the Visually Handicapped, Sight Conservation (DSVH-SC) uses this approach to help make prospective parents in high school and university health education classrooms aware of correctible childhood visual defects. During the past school year, our staff community health educator taught these concepts in 176 classrooms to 5,563 students across the state.

Our Low Vision Lens Service (LVLS) is an expanding 26-year-old sight restoration effort directed at helping individuals with limited vision utilize this vision to its most efficient degree by use of special low vision optical aids. Since beginning low vision clinics during 1959, we have seen 3,616 first-time clients. Many of these people return for re-evaluations, as their vision continues to deteriorate.

Last year, 355 clients were seen in clinics held at Logan, Ogden, Salt Lake, Provo, and St. George. Diversified types of high powered magnifiers provide significant near and/or distant visual improvement for over 68 percent of the seriously impaired referrals who have been evaluated.

Participating staff eye physicians are reimbursed from DSVH-SC funds. University of Utah resident eye physicians also receive low vision training at this clinic on a contractual arrangement between the Utah State Office of Education and the University of Utah. A change in clinic referral procedures this year could increase the number of clients in our LVLS during the coming fiscal year.

Other sight conservation needs addressed during the year included visual screening of exceptional children, geriatric nursing home patients, and Navajo Indians on the Utah Reservation. Each of these groups manifested serious visual neglect. The provision of on-site ophthalmological evaluations has demonstrated our desire to identify and provide more effective vision care for these neglected Utah residents. One out of every three individuals screened was referred for further evaluaton or treatment of a previously un-

known eye problem. A special problem exists in testing the "exceptional" children, many of whom are severely handicapped. Our vision screening, thus far, has identified 1,628 individuals needing visual attention among the 4,589 we visually screened.

The Navajo Tribal Council paid expenses and a modest professional fee for ophthalmological evaluations by a Utah eye physician during on-site clinics at the Navajo Reservation in May, 1985. DSVH-SC staff visually screened 322 Indians and referred 106 for follow-up vision assistance. The ophthalmologist prescribed 52 pairs of glasses and recommended further ophthalmological treatment and surgery for eight more of the seventy evaluated in three well-separated clinics held on the Navajo Reservation. Reservation officials were enthusiastic about the assistance given, since they are aware of their great need for this service.

UTAH SCHOOLS FOR THE DEAF AND THE BLIND

The primary objective of the Schools is to provide a comprehensive education program for all hearing-impaired and visually-impaired children in the State of Utah beginning with birth through high school graduation or age 21.

UTAH SCHOOL FOR THE DEAF

The Utah School for the Deaf offers a day and residential program in Ogden as well as day classes for the deaf in a number of other cities. Day classes are also part of the School's Extension Division and are housed in public schools in Logan, Orem, Provo, Salt Lake City, Richfield and St. George. These classes are carefully placed in public schools so that only two or three classes are housed in each school in order to provide all levels of instruction, but not necessarily in the same school.

The Utah School for the Deaf offers two programs of instruction, one using the Oral/Aural approach and the other using the Total Communication approach. This is a prospectus unique to the State of Utah.

State-wide Parent Infant Program

This service is available from birth to age four-and-one-half. It is in cooperation with the Utah State Division of Health, which screens infants in hospitals and offers assessment and evaluation of children through audiological testing and language testing. Fitting of hearing aids, parent counseling and education, facilitation of language within the home on a weekly visit by an advisor, and monthly parent group meetings are also part of the program.

Preschool Classes

This service is available to children two and one-half to four-and-one-half years of age. Daily half-day sessions are held which include developmental activities used in preschool for hearing children but with greater emphasis on language and communication development. Individual or small group instruction in listening and cognitive skills, parent counseling and education, systematic audiometric and psychological testing and assistance in selection and evaluation of hearing aides are also part of the preschool.

Primary and Secondary Classes

Classes are housed in regular public schools, in various geographical locations throughout the state. This service is for ages four-and-one-half upward. The School has developed speech, listening skills, language, and reading curriculums which give cohesion to the educational program. Public school guides are also used and adapted in all subject areas.

Multiply Handicapped Classes

Opportunities are being expanded for multiply handicapped students in need of additional services or different program approaches. A carefully structured multisensory approach is employed in special classes for multiply handicapped hearing-impaired children.

Career Education and Prevocational Programs

A prevocational program is organized to prepare students in elementary grades at the School for the complex demands of vocational preparation. Students are exposed to general occupational areas and homemaking skills. A specialist supervises a program of education and on-the-job training, working with other state agencies, local business, and the State Division of Rehabilitation Services. Programs are available to woodworking, auto body, electricity, graphic arts, business, and home economics. Career exploration evaluations are conducted on students in the junior and senior high school. The school curriculum includes more than twenty-four subjects which are rotated so that all students on the Ogden campus will have exposure to all of them during their school years. Students in the Extension Division often times follow the public school vocational program with assistance from the vocational specialist.

Integration and Mainstreaming

Those students, both oral and total communication, who demonstrate adequate communication and academic skills to the staff, are integrated on a trial basis into public school classes in one or more subjects in which they are apt to succeed. The integration process is expanded as the student continues to demonstrate the ability to succeed. Mainstreaming back into the public school often occurs when the educational team recommends such a move. The team is composed of staff from the School for the Deaf and the public school staff members.

Audiological Services

Pure-tone audiological testing and speech reception threshold, together with hearing aid counseling and evaluaiton, is provided by the School free of charge. All students are tested on a regular, ongoing schedule with and without amplification. A hearing aid bank is maintained for back-up services to children.

Psychological Testing and Behavior Management

Psychological testing, both verbal and non-verbal, is provided for all students and referral to other state agencies is made as needed. General aptitude test batteries are conducted annually for students pursuing career planning. Assistance to severe behaviorial problems is provided to children having difficulty in school.

Dormitory Services

The School maintains a Residential Living Program in Ogden for those students who live beyond daily commuting distance. Several oral/aural students in the Weber County area are placed in a Foster Care Program. Total communication students are living in the two residential dormitories located on the Ogden campus.

Foster Placement

The School provides foster placement when the Individual Education Plan makes such recommendation. Certified social workers provide an opportunity for personal consultation and guidance to families housing hearing-inpaired children in the Foster Care Program.

Deaf-Blind Program

The Deaf-Blind Program has the primary goal of educating students to learn to live in the world as productive people. Although each student may not achieve the goals of independent living and working, it is imperative to help all pupils develop their maximum life survival-coping capacity.

Medical Support

Medical support and consultation are provided for all students whenever required. A registered nurse is on staff to administer medications under a medical doctor's prescription.

UTAH SCHOOL FOR THE BLIND

The academic program of the Utah School for the Blind parallels that of the public schools. However, special methods of instruction, equipment, and materials are used. The educational program is a continual process of development and evaluation. Every effort possible is made to individualize and strengthen the curriculum to meet the needs and capabilities of the students enrolled.

The majority of students come from the Wasatch Front area of Utah and are served on a day basis. Since two classes of the Salt Lake City Satellite Program were opened in 1980, the program has grown to five classes at East Mill Creek and eight at Canyon Rim in the Granite School District. Two additional classes were also started in the Alpine School District in 1983-84. Presently there are three: two at Manila and one at Windsor. Present trends indicate that the Satellite Program will continue to grow faster than the residential portion of the School. Thus the majority of the students enrolled now are day students with two-way transportation furnished by the School.

The residential component of the School mainly serves the outlying areas of the state and multi-handicapped students. Most of the rural school districts do not have teaching programs specifically for the visually impaired. It should be noted that over 90 percent of the visually impaired students enrolled at the Ogden Campus are multi-handicapped. In recent years there has been a shift in the School's population from secondary to preschool/elementary. The population of the School continues to become younger every year.

State-wide Parent-Infant Program

Since 1970, the Utah School for the Blind has attempted to serve the needs of visually impaired preschool children. For many years, only one person was on staff to serve this populaton of visually impaired statewide. Beginning in 1977, additional funds were provided to increase the number of staff and services for the preschool child. As a result, the present Parent-Infant Program was eventually initiated with five Parent Advisors being trained. They served in local areas on contract.

By regularly contacting many agencies throughout the state, the present referral system was developed and most preschool visually impaired children are identified before they are a year old. An Infant Development Nurse with a background in early childhood development directs the program. She assists parents in locating services that serve the specific needs of the child. As soon as the nurse deems advisable, a trained Parent Advisor is assigned to visit the home on a weekly basis. The Parent Advisor usually works with the parents and child until age three. At that time, if sufficient developmental progress has been made, the child becomes eligible for one of the center-based preschool programs.

Project Insite

This federally funded program started in the fall of 1981 and concluded at the end of the 1982-83 school year. The services to the rural districts are now an integral part of the Parent-Infant Program.

Preschool Program

Since 1980, a center-based preschool program has been available for most visually impaired children in Utah. At age three, a placement decision is normally made by an IEP placement team, comprised of the Infant Development Nurse, the Parent Advisor, the parent, a teacher and administrator from the Utah School for the Blind, and a representative from the child's local school district.

A variety of placement options are available. The child may remain in the Parent-Infant Program, transfer to the Utah School for the Blind's Preschool Program, or enter a local neighborhood preschool or other agency. The School offers a center-based preschool program in Ogden, Salt Lake, Manila, and Orem.

Kindergarten

At age five, the visually handicapped child becomes eligible for kindergarten. They can attend in Ogden, Salt Lake City, or Manila. This program focuses on "school readiness" as all kindergarten programs do. Two way transportation is provided each day.

The beneficial results of all these preschool programs have been a more accelerated development for visually handicapped children. Many "blindisms" and developmental complications are avoided and the children are more prepared for school. Earlier mainstreaming results for most of the visually impaired children because of this early intervention.

School Program

The programs at the Utah School for the Blind are located in Ogden, Salt Lake City, Manila, and Orem. Visually impaired and multi-handicapped visually impaired children are served between the ages of six and twenty-

one. A rich environmental experience specific to their needs is provided for young, visually impaired students. This program enables them to learn from concrete examples and real-life situations using their remaining senses and any residual vision they have. Early training is given in large motor activities to assist in the development of orientation and mobility skills. Tactile senses are developed to help the student in distinguishing sizes, shapes, textures, and the location of objects. Increased development of tactile skills assists those students who need to learn braille.

As students progress through their school years, a general education program similar to the public schools is available to them. Instruction is given in language arts, social studies, science, mathematics, health, and physical education. Some additional areas of instruction vital to the development of a visually handicapped student are living skills, orientation and mobility, typing, music, swimming, low vision skills, braille, and electronic reading devices. All are extremely valuable skills for students who will later be mainstreamed into the public schools.

Integration and Mainstreaming

The goal of the educational program is to prepare students to perform adequately in the public schools when at all possible. A number of visually impaired students are integrated part time in the local schools adjacent to Utah School for the Blind. Visually impaired students attending extension classes are also mainstreamed into adjoining classrooms with sighted peers. In recent years, this part time attendance in public school has expanded to younger and younger students so that some first and second graders are now attending Ogden elementary schools for part of the academic day. When students are prepared to be mainstreamed they are encouraged to return to their local public school for full time enrollment.

Teacher Consultant Program (USOE Grant)

Visually impaired students attending regular classes in rural school districts receive assistance from teacher consultants on a weekly basis. The teacher consultants are certified teachers selected in various rural areas by the Outreach Services Program Coordinator and trained in the specific needs of the visually impaired. The Program Coordinator supervises their activities, provides supplies, and assists as needed. This makes it possible for more students to attend their local school.

Prevocational Program

Career awareness has been infused in the curriculum for many years. With an increased enrollment of multi-handicapped, visually impaired students having difficulty with the traditional academic program, the faculty felt a need for more of a prevocational program. This program teaches prevocational skills and attitudes that will be helpful to students preparing for future training programs or employment.

Autism Program

The Autistic Program is an intensive short-term (about two years) residential program for autistic children ages five through twenty-one with extreme behavior problems. Children requiring a highly structured, restrictive, twenty-four hour program within a residential educational setting may be placed here via the IEP placement process. School districts may refer very difficult to

manage autistic children to the program by inviting the staff to a placement meeting. Through the IEP process, specific behavioral goals are determined. The primary emphasis is to reduce these inappropriate or destructive behaviors that prevent the child from functioning in his/her home and/or local school. The program strives to develop those behaviors that allow the child to return home and enjoy a less restrictive educational environment as soon as practicable in accordance with the IEP objectives.

Residential Program

Students outside a fifteen mile radius of our center-based program may be served by the dormitory during the week. However, any student through the IEP process may be served by the dormitory for special needs. Most students leave the dormitory each weekend. Some who live long distances from the school remain in the dormitory over the weekend. They travel home monthly, usually over holiday weekends. Vans pick them up Sunday evening at a variety of stopping points from Logan on the north to Orem on the south and bring them to school. Friday after school, parents or other family members meet them at the same pick up points for the weekend at home.

The dormitory is an extension of the visually impaired student's school day. Many of the extra skills that visually impaired students have to master are offered during dormitory hours. They teach daily living skills, apartment living, orientation and mobility, personal hygiene, recreation skills, social skills, cultural appreciation, and physical fitness which are integrated into the dormitory schedule. Teachers, specialists, and counselors coordinate classes, field trips, and training sessions to partially accomplish this in the after-school hours.

Students have specific times scheduled for completing academic and prevocational home work assignments. The counselors assist students with the drill work required to acquire the specialized skills necessary to overcome problems associated with the visually impaired.

Familiarization Field Trips

Visually impaired students require actual experiences more than their sighted peers. Films, books and pictures do not convey an adequate concept to the visually impaired. Therefore, typical fieldtrips to the fire station by public school classes as enrichment for sighted children are almost mandatory for sightless children. Their need does not stop with enrichment visits to banks, workshops and grocery stores. "Hands-on" experiences are basic to gaining a more complete concept of their world. Preparation in the classroom with periodic visits to the community is routinely made as part of the school and dormitory programs.

Orientation & Mobility/Living Skills

The highly specialized skills required to travel with a cane (O&M) and required to complete the tasks of daily living are taught by specialists. The skills are taught at school, in the home, and in the dormitory. Dormitory counselors and teachers reinforce the skills during all activities. Parents are encouraged to attend student training sessions at school and some sessions are even conducted in the home. Skills are internalized faster when parents understand the skills and are supportive.

Medical Support

A registered nurse is available during the day time and on call twenty-four hours per day. Medications prescribed by the child's doctor are dispensed under the supervision of the nurse. The general health of each child is monitored. Recommendations are made for parents to visit with the child's doctor if serious symptoms are detected. Minor accidents are treated locally by the nurse. When more serious mishaps occur requiring emergency treatment, the nurse accompanies the child to a local hospital. Parents are immediately notified.

CHILD NUTRITION SECTION

During 1984-85, the services of the Child Nutrition Programs Section included general direction and assistance in the following areas:

1. School Lunch Program (37.6 million lunches served in public and private schools and residential facilities).
2. School Breakfast Program (751,000 breakfasts served in public and private schools and residential facilities).
3. Special Milk Program (254,000½ pints of milk served in public and private schools and residential facilities).
4. Child Care Food Program (8.4 million meals served in Child Care Food Program facilities).
5. Summer Food Services Program For Children (130,000 meals served in Summer Food Service facilities).
6. Food Service Equipment Assistance Program (Inventory Control).
7. U.S. Department of Agriculture Donated Foods (Commodity value - $7.6 million).

The accompanying chart provides revenue source data for the Child Nutrition Programs for the 1984-85 school year.

SOURCE OF FUNDS
CHILD NUTRITION PROGRAMS
1984-85

PROGRAM	FUNDING SOURCE	AMOUNT
Lunch	Federal	$16,159,232
	State	$ 8,427,084
Breakfast	Federal	$ 543,223
Child Care		$4,408,356
Food Program	Federal	$ 98,055 (C.I.L.O.)*
SFSPFC (Summer)	Federal	$ 117,570
Special Milk	Federal	$ 23,869
FSEA (Equipment)	Federal	0
Commodity	Federal	$ 7,600,000
Student Payments/ Other	Local	$26,250,000
GRAND TOTAL		$63,627,389

*Cash-In-Lieu-Of

In addition, the section performs administrative and nutritional reviews in districts and institutions to assure compliance with state and federal regulations; provides technical assistance as requested by participants; develops an annual financial and staffing plan; provides a prototype free and reduced price meal and free milk policy; interprets state and federal regulations; and provides guidance for overall program administration.

This section is committed to offering high quality, nutritionally well-balanced meals to the children of Utah, and recognizes that a properly balanced diet is essential to the physiological and mental well-being of developing youngsters. It seeks to expand the Child Nutrition Programs to non-participating schools and institutions and to maintain and improve the quality of current programs.

All public schools except six participate in the National School Lunch Program. These six schools have a very small enrollment. Residential child care institutions, private schools, child care centers, and family day care homes participate in the Child Nutrition Programs, in addition to the public schools of Utah.

The personnel of this section organized and conducted statewide workshops for local administrators in:

1. Program Management
2. Free/Reduced Price Policy Administration
3. Record Keeping (Financial, Nutritional)
4. Menu Planning
5. Quantity and Quality Food Production
6. Inventory Control
7. Computerization of Child Nutrition Programs

PART III
OFFICE OF PLANNING AND EXTERNAL RELATIONS

RICHARD E. KENDELL
Associate Superintendent

ROBERT L. LEAKE
Associate Superintendent

During 1984-85, education reform mandated by both the State Board of Education and the Legislature continued to give primary direction to the work of the Office of Planning and External Relations and resulted in workload increases in all sections of the Office. The Board's education reform is summarized in a report, Action Goals of the State Board of Education.

The Community Education Services Section was revamped and renamed to reflect the tremendous increase in work in the areas of Career Ladders, Year-Round Schools and other efforts such as more efficient use of school buildings, Productivity, Incentives for Excellence, and Parental Involvement. That section is now titled the School/Community Development Section.

A new associate superintendent, Robert L. Leake, assumed leadership of the Office of Planning & External Relations when Richard E. Kendell resigned to accept an executive position in private industry in April, 1985.

SCHOOL/COMMUNITY DEVELOPMENT SECTION

This report is a brief summary of the work carried out by the School/Community Development Section, Utah State Office of Education, during the fiscal year July 1, 1984 to June 30, 1985.

The purpose of the School/Community Development Section is threefold: to assist in the design, development and implementation of new and innovative programs; provide leadership to the Community Education processes and programs; and serve as a liaison to organizations and groups affiliated with education in Utah and nationally.

PART III
OFFICE OF PLANNING AND EXTERNAL RELATIONS

TEACHERS CAREER LADDERS

The 1984 Utah State Legislature passed House Bill 110 "Teachers Career Ladder" and appropriated funds in the amount of $15.2 million for the 1984-85 school year. Career Ladder Standards and Guidelines were approved by the State Board of Education which provide the necessary direction for local districts to develop individual career ladder plans and require State Board approval prior to implementation. All 46 local education agency plans were approved by the Board and were fully implemented during the school year. During the 1985 Legislature, Senate Bills 14 and 291 were passed which added to HB110. Revised Career Ladder Standards and Guidelines were developed under the direction of the School/Community Development Section staff. The new standards and guidelines were approved by the Board in April of 1985. During the last week in April, a statewide career ladder conference was held which assisted local education agencies in the development of the 1985-86 plans according to the added legislation and new standards, and to share the best career ladder practices in the state. Local education agencies continued to refine their career ladder plans until all plans were approved by the Utah State Board of Education. Forty-six plans were approved and are now fully implemented in all education agencies in the state.

PRODUCTIVITY

The 1984 Legislature appropriated $1,000,000 to fund further productivity studies. Eighteen proposals were funded involving 15 local school districts plus two educational service centers: Alpine, Box Elder, Cache, Carbon, Davis, Garfield, Jordan, Logan, Nebo, North Sanpete, Ogden, Provo, San Juan, Washington, Weber, plus Northeastern Utah Educational Service Center and Southeastern Utah Educational Service Center. The School/Community Development Section monitored the 18 productivity projects during the 1984-85 school year.

During the early spring of 1985, the Legislature appropriated $1,200,000 for further studies and expansion of educational productivity in Utah. Proposals were submitted under six major categories: (1) innovative staffing patterns, (2) proficiency-based programs, (3) scheduling options, (4) improved use of technology, (5) ideas developed through teacher initiative, and (6) programs to improve the efficiency of classified employees. The School/Community Development Section managed the proposal submission and review process during the last four months of the 1984-85 school year. After careful review and evaluation of the proposals submitted by local school districts, 27 proposals involving 28 local school districts were selected for funding. These projects were notified of their selection and began to implement their projects on July 1, 1985.

YEAR-ROUND SCHOOLS

The 1985 Legislature appropriated $1,500,000 to assist local districts in their efforts to investigate or develop year-round scheduling options for elementary schools. Standards and guidelines for the administration of the new program were developed and approved by the State Board of Education on April 12. All districts were invited to submit application for the first round of funding during the 1985-86 school year. Following an intensive review process, eleven school districts were funded to conduct either planning or development activities in 40 schools. The section has been deeply involved

in providing technical assistance and grant administration to this important new program.

PARTNERSHIPS IN EDUCATION

Educational partnership building, particularly with the business sector, began in 1984. An intensive training workshop was held with teams of educators and business people from ten school districts. Support was given to district plans that were developed and some models for business-education partnerships were developed. Over 200 Utah educators and business persons from school districts throughout the state participated in the first National Teleconference on School/Business Partnerships which was sponsored by the National Community Education Association. This served as a primary catalyst to launch a number of partnerships in education across the State of Utah.

INCENTIVES FOR EXCELLENCE

The Section is responsible for administration of the "Incentives for Excellence" program. This has included formulating the standards and guidelines, setting up administrative procedures, reviewing district plans, and certifying the matching state funds.

A one-time legislative appropriation of $250,000 was given for the 1985-86 school year. The purpose of this legislation is to promote a strong partnership between public education and private enterprise, to provide impetus to school districts that are seeking financial support from the business community, and to enhance educational excellence within the state. In order for a district to receive state matching funds, it must certify that local funds have been received from the private sector and that the expenditure of state and matched money is being used for: programs, practices, learning materials, and equipment that improve student performance in the required state school curriculum.

PUBLIC INVOLVEMENT IN EDUCATION DECISION MAKING

The Utah State Board of Education has identified public involvement in education decision making as one of its five major goals for education in Utah. The involvement of the public in education has for many years been a major priority. The schools belong to the public and the public has the right to be appropriately involved in all decisions which affect the schools. The long-term impact and the effectiveness of such decisions are also greatly strengthened through the orderly and systematic application of the process of involving the public. To effectively involve those who should be involved in making an educational decision requires certain attitudes, skills, and commitments on the part of both educators and community members. The staff of the Section has assisted school districts throughout the state in the development of effective public involvement decision making systems and has provided training as well as ongoing technical assistance.

SCHOOL MANAGEMENT/TECHNICAL ASSISTANCE

The Section has taken a leading role in assisting school districts with all phases of planning as districts work to meet the needs of the citizens. The staff has consulted with boards of education, superintendents, principals, district staff, and local community groups in the processes of long range plan-

ning and changes, in the allocation of resources, and in the involvement of the public to increase support for education. Specific techniques used included skills in strategic management, marketing, Quality Circles, team building and group work skills, communication, problem solving, and strategic planning.

A close working relationship has been established with the following associations: the Utah Education Association and some district teacher education associations, the Utah Congress of Parents and Teachers, the Utah School Boards Association, the Lifelong Learning Committee, the Utah Community Education Association, the Utah Schools for the Deaf and Blind, the Mountain Plains/Adult Education Association of Utah, the Center for the Deaf and Blind, and the Utah Association of Elementary School Principals. This working relationship has included technical assistance in education planning, team building, process facilitation, conflict resolution, systematic problem solving, and community group effectiveness training.

THE COMMUNITY SCHOOL AS A DELIVERY SYSTEM

Schools in Utah are classified as community schools to the degree that they are open and responsive to their surrounding community. In community schools, people of all ages feel welcome. They come to the schools as volunteers; as "instructors" to share their special hobbies, skills, or experiences with the children in their enrichment classes; as members of school-community councils or task forces established to help solve problems; as learners; and as participants in recreational activities with family and neighbors. During the 1984-85 fiscal year, over 1,000,000 Utahns participated in some form of educational, social, recreational, or community problem solving activity through their local community schools. The section is involved in providing training, information, and technical assistance for local community school personnel as well as to monitor the progress of local and statewide community school services.

QUALITY CIRCLES

The Section has been responding to requests from districts for Quality Circles training. The staff has written a Quality Circles Training Manual and developed supporting instructional materials specifically adapted to education. Currently, there are thirteen districts who are using Quality Circles as part of their decision making and management process.

LIFELONG LEARNING

During the past year, several members of the staff have served in an active support role to the Consortium for Lifelong Learning. The purpose of this education and service agencies consortium is to secure legislative and agency interest in and support for collaborative efforts to further the concept of lifelong learning. A resolution in support of lifelong learning was drafted and signed by the Utah Community Education Association and the Adult Education Association. Through the assistance of Senator William Barton, this group was successful in getting SB-17 passed in the 1985 legislative session. This bill mandates local school boards to cooperate and work with other community agencies in ways that save tax dollars and improve services.

SCHOOL VOLUNTEERS

The efforts to encourage school volunteer programs during the past year have been three-fold: 1) Staff training and technical assistance to district-level coordinators of volunteer programs; 2) Networking with volunteer groups, i.e., Utah Council of Volunteers, Utah Area Association of Directors of Volunteers, Voluntary Action Centers, and the ACTION Agency; and 3) Strengthening working relationships with the Utah School Volunteer Program Association.

The training, sharing of information, and development of materials have resulted in strengthened leadership and capabilities for volunteerism at the school district level, heightened awareness, and increased the number of volunteers in Utah schools.

MOTT FOUNDATION GRANT

Late in 1983, the School/Community Development Section prepared a proposal for building public confidence in education through local partnerships and submitted it to the Mott Foundation for possible funding. The Mott Foundation has, as one of its major goals, the promoting of partnerships between communities and educational structures which ensure community participation and institutional responsiveness for strengthening the quality of living of individuals and their communities. The Foundation funded Utah's proposal for the 1984-85 school year. Money was provided to fund six regional conferences or workshops in Utah focusing on the topic of "Building Public Confidence in Education Through Local Partnerships". The School/Community Development Section closely collaborated with six Utah agencies and associations in planning and conducting six conferences as follows: 1) Utah Congress of Parents and Teachers Critical Issues Conference — October, 1984; 2) Utah Congress of Parents and Teachers "Think Tank" Partnership Conference — October, 1984; 3) Vocational Education Master Plan Working Partnership Conference — January, 1985; 4) Utah Education Association Evaluaton of Educators Conference — February, 1985; 5) Building Partnerships for the Core Curriculum Conference — May, 1985; and 6) Utah Association of Elementary School Principals "Raising Our Sights and Our Standards" Conference — June, 1985.

Finally, the results and important information gleaned from each of these six collaborative conferences was published in monograph form to permit those who were not in attendance to also benefit from what took place. These six monographs were published in large numbers and were distributed both locally and nationally. Based upon the success of the 1984-85 workshops and monographs, a new "Building Public Confidence" Mott Foundation proposal was written during the Spring of 1985 and has now been funded so the Section can continue it's work in this area to build public confidence in and support for Utah's public educational system.

PUBLIC INFORMATION AND RELATIONS SECTION

During Fiscal Year 1985, the Public Information and Relations Section expanded its efforts in response to the growing need for public awareness of every aspect of Utah's education reform movement, meeting new needs

as well as sustaining its ongoing responsibilities. The Section prepared and disseminated 275 news releases to media and other sources. Over 95 percent of these releases were printed in newspapers or broadcast on radio and television. News articles resulting from these 275 releases totaled over 2,500 statewide.

The Public Information staff also helped plan, design, and oversee 14 30-second public service announcements which were distributed to television and radio stations throughout the state. Staff also provided writing and graphics assistance for 27 special projects in the form of flyers, brochures, programs, posters, media releases, and photography. They developed and produced over 100 pieces of marketing/publicity items.

The annual calendar of school district holiday schedules was prepared, printed, and disseminated. In addition, over 950 copies of the monthly education calendar were distributed throughout the year. News clippings about education collected, reproduced, and distributed were in excess of 5,000. Seven issues of Utah Schools, the official publicaton of the State Broad of Education, were prepared, printed, and disseminated to an increased circulation of 17,500 during the school year. The Section responded to an average of 45 telephone inquiries per day.

Throughout the year, the director of the Public Information Section continued to serve not only as Public Information Officer to the State Office of Education but also as the Director of Public Information to attend meetings and retreats throughout the state, give special presentations at workshops and conferences on numerous education reform and other topics, offer technical assistance to diverse components of the state agency as well as local school districts, work with television specialists in the production of several mini-series on classroom loads, discipline, handicapped student programs, child abuse, and other topics, and prepare speeches and other materials for the State Board and State Superintendent of Public Instruction.

EVALUATION AND ASSESSMENT SECTION

The Evaluation and Assessment Section provided a variety of different kinds of leadership and technical assistance in the areas of research, evaluation, measurement, and needs assessment to the staff of the State Office of Education and local education agencies. This included a broad range of projects such as the design and analysis of needs assessment studies, program evaluation, research design, construction and validation of measurement instruments, data analysis projects, and reporting. Activities ranged from helping clients design their own studies, to carrying out major intact studies in each of the areas listed above. The following are examples of major projects and accomplishments of the Evaluation and Assessment Section during fiscal year 1985:

The Utah Statewide Educational Assessment Program

During the past fiscal year, all analysis and reporting was completed for the 1984 Utah Statewide Educational Assessment Program. This is the continuation of a program which has been functioning since Utah initiated a program of statewide assessment in 1975. The purpose of Statewide Educational

Assessment is to help gauge the effectiveness of public education in the state. The 1984 assessment is the fourth major study in the program and included a random sample of 65 elementary schools and 30 high schools, statewide. Over 7,500 fifth and eleventh grade students participated in the study. Some of the major areas measured in the 1984 statewide assessment included:

- Mathematics
- English
- Music Achievement
- Career Exploration
- Reading
- Art Achievement
- Academic Self-Concept
- Peer Relations

Utah's Statewide Assessment Program uses extremely sophisticated data processing and report generating techniques in providing information on the status of student performance across the state, as well as research information on the relationships between student performance measures and educational process indicators. The program uses both norm-referenced and objective-referenced tests, as well as measures of school-relevant attitudes.

Individual student and school reports were provided to all Utah elementary and high schools in the sample. During the past year a comprehensive, General Report, as well as an Executive Summary of the findings of the 1984 assessment were completed and provided to a variety of different audiences including the State Board of Education, the Legislature, school districts, and schools throughout the state.

The Utah Educational Quality Indicators Program

During fiscal year 1985 the Evaluation and Assessment Section continued to collect and report information concerning the status of educational performance in the state as part of the Quality Indicator's program. This series capitalizes on performance information collected from sources independent of the school system. Some of the major sources of information which are regularly collected for the Quality Indicator's program are the following:

- American College Testing Program Results (ACT)
- Advanced Placement Results (AP)
- Adult Educational Attainment
- Scholastic Aptitude Test Results (SAT)
- Preliminary Scholastic Aptitude Test Results (PSAT)

A major report in the Quality Indicators series is currently under preparation and will be published early in 1986.

Other Evaluation and Assessment Section Accomplishments

In addition to the major efforts described above, the Evaluation and Assessment Section accomplished the following activities and projects:

- Major technical assistance was provided to 18 Utah school districts during Fiscal Year '85. Technical assistance and/or consultation in technical areas was provided for over 40 State Office of Education staff members.
- A major report was completed dealing with an analysis of existing and possible achievement testing practices in Utah and the nation.
- A survey of the reactions of school districts to existing and possible testing practices in the state was accomplished.

- Concept papers were prepared on options for pilot testing and field testing the state's core curriculum.
- Data were collected and a report prepared describing the participant evaluation of the 1985 Law-Related Education program Mock-Trial Competition.
- Data analysis and report generation were completed for the Office of Vocational Rehabilitation's training needs assessment.
- In cooperation with the Box Elder School District, a major evaluaiton of the third year of the implementation of the four-day school week at Park Valley School was accomplished and the results reported to the Box Elder Board.
- Evaluations of several statewide conferences were completed. These projects included designing of evaluation forms as well as data analysis and reporting.
- Two meetings of the Utah Testing and Evaluation Council were held during fiscal year 1985. The council continues to provide a resource for educators at the district and state level whose responsibilities lie in the area of evaluation and assessment. The council is a joint effort on the part of State Office of Education and Utah school districts to share professional information and enhance the effectiveness of testing and evaluation statewide.
- A micro-computer based program was developed to assist in examining vocational education enrollment information to help detect evidence of inequitable enrollments with respect to sex, ethnicity, and handicapping conditions.
- The section provided consulting and technical assistance for the evaluation of the Spanish Accelerated Learning project. Consultation was also provided to the project in dealing with a number of other technical matters such as data communications and specification of objectives.
- Data analysis was provided to the Jordan School District for an extensive analysis of student transcripts to determine patterns of course-taking in the district.
- During fiscal year 1985 several special studies were completed. These included a report on the relationship between Utah's educational productivity model and class size, as well as a study of the educational performance and other characteristics of small schools in the state.
- The section presented numerous workshops dealing with the results of the Effective Schools research.

INFORMATION AND INSTRUCTIONAL SYSTEMS SECTION

The Information and Instructional Systems Section (IIS) is charged with providing information services to the Utah State Office of Education and the local school districts of the State of Utah.

The past year has again been characterized by substantial growth in the number of districts which are now taking advantage of those services.

IIS has three units: Marketing and User Support Services, Systems Support Services, and Information Services. During the school year 1984-85, our on-line terminal support approached 800 terminals, which was the result of the continued implementation of the Student Information System (SIS) as well as other on-line data base access facilities.

The section presently operates an IBM 4381 mainframe computer with 16 megabytes of memory and supports a telecommunications network which extends from Logan on the north to St. George, Kanab, and Monticello on the south, and from Wendover on the west to Vernal on the east.

Because of the cooperative use of data processing hardware and software to solve information systems problems by the school districts, the cost to the State of Utah for these services has been dramatically and significantly minimized.

MARKETING AND USER-SUPPORT SERVICES

The 1984-85 school year was the first production year for the Student Information System (SIS). Extensive inservice training was provided to user districts for proper handling of transactions on the rapidly expanding telecommunications network. Many school districts converted their student record history to SIS. Planning and analysis occurred relative to the development of additional segments to be added to SIS in the future.

Specifically, the following items were added to SIS during this school year:

1. A Youth-In-Custody subsystem was added for record keeping of these students.
2. As a result of actions taken by the 1984 State Legislature, the special education subsystem to SIS was completely revised. A massive training program was launched by district liaison personnel in cooperation with special education specialists to properly implement the new program.
3. The standardized test scoring applicaton experienced significant growth. Processing of test sheets increased by 50 percent.
4. The Guidance Information System (GIS) was introduced and made available during this fiscal year. Fourteen school districts took advantage of this service during the first year.

The fiscal system continued to expand with increased application users. With the expansion of the telecommunications network, many districts expanded their microcomputer link-up to the mainframe computer. The Advisory Committee for Fiscal Users was established to help assess the priorities for future development of the overall fiscal system. The committee functioned very well during this school year.

SYSTEMS SUPPORT SERVICES

A major effort has been made to design and program a new teacher certification system. The system has approximately 125 programs with 20 on-line interactive screens.

Work continued on SIS. An additional 30 batch programs were written, as well as programs to support another 20 on-line interactive screens.

An on-line warehouse system for use by school districts was designed and programmed. The system includes 28 on-line interactive screens, and 85 supporting programs were written.

The purchase of a new scanner made it necessary to rewrite 48 programs used to interpret/score scan sheets, as well as write new programs to preprint the new-size sheet.

The number of lines increased to 29, and terminals are nearing 1,000. These figures are double a year ago. It has been a major effort to support this increase without degrading service.

INFORMATION SERVICES

The Information Services Unit has provided guidance in putting some of our systems on data base such as Teacher Information File, Rehabilitation Client Statistical and Fiscal Files, and Personnel of the State Office of Education.

The IBM 4341 12 megabyte central processing unit was replaced with an IBM 4381 16 megabyte central processing unit. Two IBM 1403 printers were replaced with an IBM 3203 printer and an IBM 4245 printer. One tape drive was upgraded, and a communications controller was installed to allow personal computers to be connected to the mainframe. This has provided better service to users in the school districts and the State Office of Education.

STATE GOVERNMENTAL RELATIONS AND SCHOOL LAW SECTION

This section is charged with responsibility for drafting legislation and policies, coordinating the legislative program for the agency, and for coordination with the Office of the State Attorney General and other units of state and local government. The section also provides technical assistance to staff of the agency, school districts, other state agencies, and legislative committees.

During the past year, the section continued its support of the effort to revise the school laws (Title 53), and participated in drafting and managing 19 bills supported by the State Board of Education, 13 of which were approved by the Legislature.

FORECASTING & LONG-RANGE PLANNING SECTION

Personnel from the Forecasting and Long-Range Planning Section worked with the Bureau of Economic and Business Research, University of Utah, to develop The Utah Public School Student Enrollment Analysis and Projection *Model*, a model for school needs and policies based upon a diversity of simulated demographic and economic data. The section also completed four significant reports: (1) Teacher Resignations in Utah, (2) The Complete Book of Funding: A Guide to Program Funding Available through the Utah State Office of Education. (3) Small Schools in Utah: A Comparative Study, and (4) House Bill 179: A Report to the Legislature.

PART IV
OFFICE OF
VOCATIONAL EDUCATION

KENT L. WORTHINGTON

Associate Superintendent

The Office of Vocational Education provides leadership and service for programs throughout Grades K-12 and for adults. In the elementary schools, programs focus on an awareness of the world of work. In middle and junior high schools, specific exploration and hands on experiences in a broad range of occupational areas is the emphasis. At the high school, programs focus on a technical core upon which specific training can be based in the technical areas of specific skill training for jobs.

Adult programs are available through area vocational centers, secondary schools, and post-secondary schools for training leading directly to jobs — often short term and intensive training but also many programs that build upon high school training that leads to employment at the technician level.

The market information made available through Job Service is the driving force for emphasis on specific training areas. Close cooperation is carried on with businesses and industries and with the Business and Economic Development Division efforts.

During 1984-85, a Vocational Education Master Plan was adopted by the State Board of Education and State Board of Regents and contains a definition of Vocational/Technical Education now being used in the development of standards, program approval processes, and legislative proposals.

The Vocational Excellence Award Program continued to honor deserving students who demonstrated outstanding achievements in state- approved vocational programs. The 1985 June Vocational Conference focused upon the theme "Education, Efficiency, and Economic Development."

SECONDARY AND POST-SECONDARY PROGRAMS SECTION

BUSINESS EDUCATION

Business Education programs in Utah provide skill training needed for business and industry. Basic business concepts and exploratory training are

PART IV
OFFICE OF VOCATIONAL EDUCATION

offered at the middle/junior high school. Specialized skill training is offered at the secondary and post secondary level.

Career training is provided in the areas of work processing, data processing, computerized accounting, office management/supervision, clerk/typist, secretary/stenographer, information processing, and entrepreneurship. Cooperative Vocational Education programs are available for students to use their entry-level skills in a local business setting while they are still attending school.

A major emphasis was given to developing competencies and tests for the areas of data processing, accounting, and word processing. The competencies to be taught were identified by business and industry. In addition, 350 businesses were surveyed to confirm the validity of the competencies. The competencies will be distributed to Business Education teachers statewide. Students passing the competency tests will be given a certificate to use in seeking office occupation employment.

The Utah State Advisory Council for Business Education played a vital part in helping with the competency program development by assisting with the business survey and pilot testing. They also served as judges for business skill competitions, guest speakers, and participated as a panel before all Utah business teachers at the June Vocational Conference. The Advisory Council supports the Business Education program and feels the programs reflect the training needed in business today.

The annual June Vocational Conference updated business teachers in Utah on skills needed by business and industry. Workshops were held describing the office of the future and today's electronic office. Teachers were actively involved and shared curriculum ideas.

Business Education teachers assisted in the development of the concepts to be taught in the Free Enterprise area of the Vocational Core curriculum. Free Enterprise continues to be an integral part of the business curriculum. Many such classes are being taught throughout the State.

BUSINESS AND INDUSTRY TRAINING SECTION

AREA VOCATIONAL CENTERS

Fiscal year 1985 saw the completion and dedication of several major program and support facilities at three of the five area vocational centers. The year was characterized by significant enrollment increases; lengthy student waiting lists in electronics, computer-related, and other high technology training programs; and strong job placements. In addition, the Office of Vocational Education took action to invest nearly a quarter of a million dollars of Carl Perkins Federal Vocational Education funds in the four planning regions of the state not served by area vocational centers.

Bridgerland AVC in Logan completed and occupied a 27,000 square foot heavy duty diesel mechanics and 12,000 square foot welding training facility as well as a 5,000 square foot administrative fiscal affairs and instructor support area in the former Wurlitzer building. Ogden-Weber AVC in Ogden completed and occupied a 33,000 square foot construction trades building and a 23,000 square foot metal trades building, as well as remodeled eight

buildings providing additional vocational training, academic support, institutional and administrative support, and ancillary services totaling 142,000 square feet at their new 90-acre campus (formerly Youth Development Center). Davis AVC in Kaysville completed and occupied a 11,000 square foot welding training facility, an additional 3,300 square feet of mezzanine classroom space, a 9,000 square foot student services and model assessment center area, a 6,300 square foot administrative, student support and fiscal affairs facility, and a 3,150 square foot cafeteria area.

Bridgerland AVC was funded to complete facilities supporting automotive, electronics and autobody training while Ogden-Weber AVC received funds to complete campus roads, walkways and underground utilities and Davis AVC received the first half of funds needed to construct facilities to house electronics, drafting and building maintenance training as well as funds to remodel an auto body repair shop. In addition, Davis AVC exercised an option to purchase 25 acres of land adjacent to the AVC campus owned by Davis School District

Throughout the year, over 14,000 adults and nearly 2,700 high school students were served by the five area vocational centers. An additional 2,200 were placed on waiting lists for training where demand exceeded resources. In addition, nearly 3,500 students were placed in productive Utah jobs related to training and became tax producers, rather than tax users, or went on for further related advanced training.

As the year ended, the Office of Vocational Education allocated $225,000 to seven local education agencies in the Salt Lake, Mountainlands, Southeast and Southwest planning regions — regions not served by area vocational centers — for AVC-type services. The funds will be used to train nearly 730 adults for jobs in computer and information related occupations, business and office occupations, the construction trades, sales, building maintenance, machining, and various bench and service trades during Fiscal Year 1986.

CUSTOM FOR-INDUSTRY-TRAINING (Custom-Fit)

The State Legislature appropriated $1,000,000 to the State Board for Vocational Education to train persons for jobs developed by new or expanding businesses in the state. The Federal Job Training Partnership Act (JTPA) through the Department of Labor provided approximately $500,000 to the State Board. These two funds are combined to encourage leveraging with local agency and business funds.

The Office of Vocational Education invited other agencies to participate on a committee to review projects submitted by staff for recommended approval. Agencies that were represented during the year were: Employment Security, Higher Education, Economic Development, Chamber of Commerce, State Job Training Coordinating Council, Rehabilitation and the State Office of Vocational Education.

Staff of the State Office for Vocational Education coordinated with local private industry councils, employers, and training institutions to establish training programs. Following are some macro results of the year's activity:

Businesses served — (Specific grants)	28
Businesses served — (Various small business)	82
	110

Trainees enrolled	927
Trainees placed on jobs	848
Average hourly wage	$5.50
Annual income (tax added)	$10,260,000
Expenditure (estimated)	$ 1,000,000

In addition to outcomes shown above, curriculum and development background work was carried out that will add approximately 1,100 new employees during the next two years.

TRADE, INDUSTRIAL AND TECHNICAL EDUCATION

Trade, Industrial & Technical Education Programs develop manipulative skills, technical knowledge, safety judgments, trade ethics, leadership abilities, and related occupational information which prepares individuals for initial employment, or upgrades, or retrains out-of-school youth and adult workers in these occupations.

The programs are located in the high schools, area vocational centers, and post-secondary institutions across the state and are recognized as the largest of the content areas in vocational education.

The growth and development of these programs are based on employment projections and needs of the modern high technology industries in Utah. The following is a sampling of the innovative programs-projects developed during the last year:

Innovative Secondary Programs-Projects

Program-Project	Region — Local Agency	
Computer Aided Drafting (CAD)	Mt. Lands	Alpine District Nebo District Provo District
Competency Based Auto Mechanics and Electronics Articulation Projects	Bridgerland Logan District	Cache District Box Elder District
Electronics Technician	Southeast	Carbon District
Carpentry Cosmetology Machine Shop (CNC) Welding (Computer Aided) Industrial Electricity	Central	Millard Dist. Ctr.
Electronics Technician Computer Aided Drafting (CAD)	Southwest	Washington District

Innovative Area Center Programs

Program-Project	Region	Local Agency
Competency Based Auto Mechanics and Electronics Articulation Projects	Bridgerland	Bridgerland AVC
Electronics Technology	Central	Sevier Valley Tech AVC
Facilities Prototypes Developed for Area Vocational Center Buildings, Auto Mechanics, Auto Body, Heavy Duty Mechanics, Welding, Electronics, Industrial Electricity, Machine Shop, Carpentry, Cabinetmaking, Meat Cutting, Material Handling, Precision Metal Finishing and Recreational Vehicle Maint.	Bridgerland	Bridgerland AVC
	Weber/Morgan	Ogden-Weber AVC
	Davis	Davis AVC

Innovative Post-Secondary Programs

Program-Project	Region	Local Agency
Industrial Maintenance Technician	Weber/Morgan	Weber State College
Commercial Photography		
Chemical Technology		
Drafting (CAD)	Southwest	Dixie College
Electronics Technology	Southeast	College of E. Utah
Air Frame & Power Plant	Wasatch Front	Ut. Tech. College/SL (UTC/SL)

The vocational leadership organizations, Future Business Leaders of America (FBLA) and Phi Beta Lambda (PBL), continued to provide students with opportunities for leadership development, community involvement, skill competition, and a greater knowledge and awareness of the Free Enterprise System.

A Utah FBLA student was one of ten national winners of the Youth for Understanding Scholarship and spent the summer of 1985 in Japan learning more about the culture of the Japanese people. The 1800 Utah FBLA students and 475 PBL students participated in district, regional and state competition. Winners of state competition represented Utah at the National Leadership Conferences. In 1984, Utah FBLA Chapters had eight national winners and PBL had 16 national winners and four regional winners. The FBLA/PBL Board of Directors met quarterly to plan activities and conferences for the leadership organizations.

CAREER EDUCATION AND VOCATIONAL GUIDANCE

The Office of Vocational Education continued to make progress in achieving its goal to establish at least one comprehensive vocational assessment intake (assessment center) in each region of the state. Eight centers are now in operation in five regions of the state. These centers will serve high school students and adults, including displaced homemakers, laid-off employees, disadvantaged and handicapped individuals.

Educational reform efforts resulted in the establishment of vocational core curriculum requirements for students at both the middle school/junior high school, and the high school level. The new high school course will require students to demonstrate they know and can apply career decision-making skills and the skills necessary to seek, secure, and keep a job.

The statewide Guidance Information System (GIS) was expanded from 50 to 70 high school, area center and college sites during the past year. This computer-assisted program provides students and adults with up-to-date occupational information and information about major Utah employers. Over 150 educators were trained to use the system during the year.

VOCATIONAL AGRICULTURE

Utah's farm income exceeded one-half billion dollars in 1984, with the multiplier effect of five fold. This means $2.5 billion to the state's economy. Milk accounted for 27.5 percent of the income, with cattle being second at 26 percent. Box Elder County is the leading county in irrigated acres, followed by Millard and Utah Counties.

Vocational agriculture instruction is carried out in 59 high schools, along with 13 Young Farmer programs. The Future Farmers of America (FFA) membership in Utah exceeds 3,500, with 500,000 members nationwide. Supervised occupational experience, classroom and field work, and the FFA blend well in making a very successful instructional program.

One and two-year technical programs exist at Utah State University in Dairy Herd Management, Ornamental Horticulture, Meat Science, and Agricultural Machinery. Additional two-year programs are offered at Snow College and Southern Utah State College.

New Agriculture I and II curriculum guides have been developed and distribution to LEAs during the Fall of 1984. The impact of changing technology in agriculture is evident with computers on farm equipment as well as being utilized by vocational agriculture teachers and farmers to assist in management decisions.

The computer-assisted farm and ranch management program was expanded with the addition of a one-half position through the Bridgerland Area Vocational Center to cover Cache County. UTC/Orem-Provo will begin a new program in this area this year.

The Utah Young Farmers Educational Association plans to make a bid to host the 1988 National Young Farmer Institute during the annual institute in Indianapolis, Indiana the first week in December.

Brenda Crane, past State FFA Reporter will be a candidate for a national FFA office. Shane Frost of the Roosevelt FFA Chapter was named regional winner in Diversified Livestock Production and will compete against three other regional finalists to choose the national winner during the National FFA Convention in Kansas City, Missouri.

Agriculture continues to play a key role in the economy of Utah.

INDUSTRIAL ARTS/TECHNOLOGY EDUCATION

The Industrial Arts/Technology Education program area has had a commitment to foster technological literacy in its courses and work activities. In

an effort to promote this concept from the junior high school level, the following activities have been accomplished:

1. The development of a K-12 Industrial Arts/Technology Education program guide. This guide will assist parents, counselors, principals and others in understanding how Industrial Arts/Technology Education is facilitated in the State of Utah.
2. The clusters of Communications, Manufacturing, Construction and Energy/Power/Transportation have been developed with preliminary course outlines and compentency lists being pilot tested.

In an effort to promote technological literacy at the high school level, the following activities have been accomplished:

1. A series of high technology teacher manuals have been developed covering the areas of Lasers, Satellites, CAD, CAM, Robotics, Photovoltaics and Computers.
2. The further development of the Principles of Technology curriculum has expanded from 4 sites in FY 84 to 12 sites in FY 85. This program gives the student a strong technical base in a combination of skills in electrical, mechanical, thermal and fluidal fields.
3. The development of the Utah Industrial Arts Advisory Committee has materialized to help provide further direction to the State of Utah. This body is made up of teacher educators, vocational directors, administrators, and local supervisors of industrial arts/technology education.

MARKETING EDUCATION

Marketing Education provides instruction designed to prepare students for work and further study in the fields of apparel and accessories, business and personal services, entrepreneurship, financial services, food marketing, general marketing, hospitality and recreation, real estate, and vehicles and petroleum. The program is a cooperative approach using both the facilities of the school and the business resources of the community. Instruction in the school is supplemented by supervised occupational experiences through the laboratory or project methods planned and conducted by the school.

Employment in the Marketing and Distributive Education occupations in Utah reached 20,000 jobs, with an annual need for 13,000 new employees.

Marketing curriculum is being modified to follow a competency-based approach making it feasible to articulate from school to school, or secondary to post-secondary. Thorough research was completed and we have become a member of a Interstate Distributive Education Curriculum Consortium. New materials are available for learning activities packets, training plans, competency-based tests in the following areas: (1) Human Relationships, (2) Apparel and Accessories, (3) Economics and Marketing, (4) Selling, (5) Mathematics and (6) Tourism. Additional LAPs are being developed on Human Relationships, Management, Selling, and CORE curriculum.

A computerized management system is also being developed to assist teachers in individualizing their instruction.

Approximately 2000 secondary and post-secondary students belong to the State and National Distributive Education Clubs of America. This organization provides business and curriculum-related learning experiences for the

Marketing and Distributive Education students. Last year, 1,100 students participated in State Career Development Conferences with 600 students being recognized for their outstanding performance. Some 90 secondary and 80 post-secondary students participated in National Career Development Conferences with many of them receiving national recognition for their performance.

HOME ECONOMICS

The following were among the many activities and events of Fiscal 1985:

July, 1984	National FHA Convention in Chicago — 50 Utah delegates
August	FHA Officers Leadership Training Meeting, Cedar City. State Home Economics Task Force Committee formed with Business and Industry.
September	Homemaker Home Health Aide Curriculum Committee formed with all agencies represented.
October	FHA Executive Council Meeting at B.Y.U.
November	County Area Vocational Directors Meeting to plan Inservice Workshop for Home Economics teachers.
December	Home Economics Inservice Workshop at SUSC. Thirty teachers in attendance.
January, 1985	Core Presentations to Ogden, Weber, Salt Lake, Box Elder, and Morgan districts.
	National FHA Convention Planning Meeting at the Salt Lake Hilton.
February	FHA Executive Council Meeting B.Y.U.
	C.H.E. Task Force Meeting at State Office of Education. Homemaker Home Health Aide Executive Council Meeting — State Office of Education.
	Home Ec in Action Meeting B.Y.U.
	Davis School District Home Economics Teachers Inservice.
March	FHA National Officer's Planning National Convention — LDS Church Office Bldg.
	National State Home Economics Supervisor's Meeting.
	Utah Home Economics Association Convention, St. George, Utah.
April	Home Economics Competency-based Curriculum in Family Life was developed and prepared for field testing.
	Judged the Sterling Scholar Finals for Deseret News in Home Economics.
May	National FHA Staff Planning Committee for the National FHA Convention in July.
	Family Life Advisory Board Meeting USU.

Final Planning Committee Meeting of June Vocational Conference and Home Economics Task Force Meeting.

June — March of Dimes State Convention. FHA represented at the meeting and activities read at convention.

June Vocational Conference — 385 Home Economics teachers in attendance.

Homemaker Home Health Aide Curriculum ready for review of all agencies involved (Division of Aging, Family Services, Public Health & Education).

VOCATIONAL LEADERSHIP ORGANIZATIONS

Ten vocational leadership organizations are presently functioning in the State of Utah:

Secondary	Post Secondary
DECA	Delta Epsilon Chi
FBLA	Phi Beta Lambda
FFA	Young Farmers
FHA	Utah Homemakers
VICA	VICA

Two others are in the developmental stages — AIASA and HOSA. During the 1984-85 school year there were 306 chapters in existence with a total of 11,936 members belonging to local, state, and national organizations.

A Coordinating Board comprised of a post secondary and five district vocational directors act in an advisory capacity to administrators of the Vocational Leadership Organizations at the State Office of Education. This Board provides valuable input and assistance.

Because leadership development is a basic ingredient of all vocational leadership organizations, two combined leadership conferences were held. Six hundred secondary state and chapter officers met for two days on the Snow College Campus, and 150 post secondary members received leadership training at a two-day conference held at UTC/Orem. In-service training was offered to all teachers/advisors in attendance at the Snow College Conference.

In keeping with State Board of Education guidelines, all organizations have made an effort to reduce student out-of-school time. Activities, insofar as possible, have been moved to after-school hours, weekends, and summers. Also, conferences, meetings, and activities are being held at centralized geographical locations.

The benefits of Vocational Leadership Organizations, as well as vocational education itself, has been promoted through the use of television, radio, and newspapers. Two brochures have been developed specifically to provide information regarding Vocational Leadership Organizations in Utah.

Regional conferences, state conferences and conventions, and national conferences were held for each organization. Utah students excelled at all

national competitive events. More Utah students were recognized as competitive event winners at the Delta Epsilon Chi and Phi Beta Lambda National Conferences than from any other state — even though Utah has fewer members than most other states.

Four first-place national awards went to Utah VICA members with seven additional members receiving second- and third-place awards. A Utah VICA member will serve as a national officer for that organization this year.

Utah has also had the distinction of being the home of the DECA and FBLA Western Region Vice Presidents during the past school year. We were also honored to have Utah selected as the location for the National FHA Convention this last summer — the first Vocational Leadership Organization National Convention to be held in our state.

Through competition held at the State Vocational Leadership Organization Conferences throughout the year, 20 Vocational Excellence Winners were selected and presented with scholarships and cash awards by Governor Bangerter.

EDUCATION EQUITY

The responsibility for ensuring educational equity in vocational education provides an opportunity for state and local personnel to work cooperatively to prevent discrimination and promote equity at each stage of the educational process. This philosophy serves as the basis for making decisions regarding the types of activities and materials that have been developed to assist vocational educators to provide an educational environment that encourages students to make career decisions based on each student's unique interests, abilities, and values without restriction because of gender, race, color, national origin or handicap.

Sex Equity

Beginning in FY 1979, Project VOTE (Vocational Opportunity through Equity) was planned and initiated. During the ensuing six years the VOTE materials have continued to be recognized as a valuable resource for educators to use to assist students to expand their career horizons, and to encourage them to select careers based on their own unique abilities, interests and values.

In response to the Governor's Task Force Report on Integrating Women into the Workforce, the Utah State Board of Education approved a plan to implement the Task Force recommendations that were identified as the responsibility of the education community. The Utah State Board of Education reaffirmed its commitment to the Board policies and positions related to ensuring sex equity in education and to supporting the recommendations in the Governor's Report. The Utah State Office of Education allocated funds to establish two model Displaced Homemaker demonstration sites to provide services to the group of women identified in the Task Force Report. Demonstration sites were established at Utah Technical College at Provo (urban) and Snow College (rural). The goal of these projects is to provide Displaced Homemakers with the skills necessary to prepare them to become economically self-sufficient.

Six regional sex equity workshops were conducted to help vocational educators to work more effectively to establish and maintain gender fair environments in which students can achieve their greatest potential.

Office of Civil Rights

During FY 1985, the procedure for carrying out the Utah State Office of Education Office for Civil Rights responsibilities as outlined in the Guidelines for Eliminating Discrimination in Vocational Education were revised. Desk audits were conducted on eleven LEAs and on-site compliance reviews were conducted in four LEAs. The Utah Annual Report documenting the Civil Rights activities carried out during 1985 was submitted on June 30, 1985 to the United States Office of Education, Office for Civil Rights.

PROGRAM IMPROVEMENT

Vocational Program improvement enhances the quality and expands the scope of vocational education in Utah through the development and improvement of vocational education curriculum, materials and personnel. This is accomplished through systematic needs assessment, planning, contract and grants management and product dissemination resulting from state supported research, curriculum and staff development activities.

Among the current activities of the program improvement section are the folloiwng projects that have significant potential for improving the quality of vocational education.

Competency-based Curriculum

The development of computer organized task lists in five vocational program areas have been started. This will make it possible to keep lists current, track student programs, assess progress and organize instruction to teach competencies with the computer. All vocational programs will be competency based and computer managed with state certification within the next five to seven years.

Vocational Core Curriculum

Extensive introductory and development work was done on the high school vocational core curriculum. Each school district was visited twice to present material and receive recommendations. The core curriculum consists of four components that will emphasize applied activities as students: (1) survey and assess the vocational implications of current and developing technologies; (2) explore applications of the free enterprise system; (3) develop management skills, attitudes and habits; and (4) assess personnel aptitudes, interests, values and make decisions incorporated into their own education plan.

Four districts have been selected for the field trials of the vocational core curriculum. Results of the field trials will be reviewed and used for a basis for full implementation according to the schedule established by the board.

Staff Development

Weber State College was granted funds to determine; in-service needs of vocational teachers of Utah, the adequacy of the present systems for assessing needs, and the effectiveness of the present in-service training delivery systems.

An extensive personnel survey was completed indicating a need for planned coordinated and expanded inservice for vocational teachers. The survey will also be used to establish priorities for the state in-service activities for the immediate future.

FEDERAL VOCATIONAL FUNDS

The Federal Vocational Ammendments Act of 1978 (PL 94-482) phased out as of June 30, 1985. It was superseded by the new Carl Perkins Vocational Bill (PL 95-824). Through the school year 1984-85 there was great speculation about the phase-out of 94-482 and whether or not 95-824 would even become law because of fiscal constraints in Washington. The new bill did pass.

The last half of the school year planning activity focused on making the transition. Following are some major differences between the two bills:

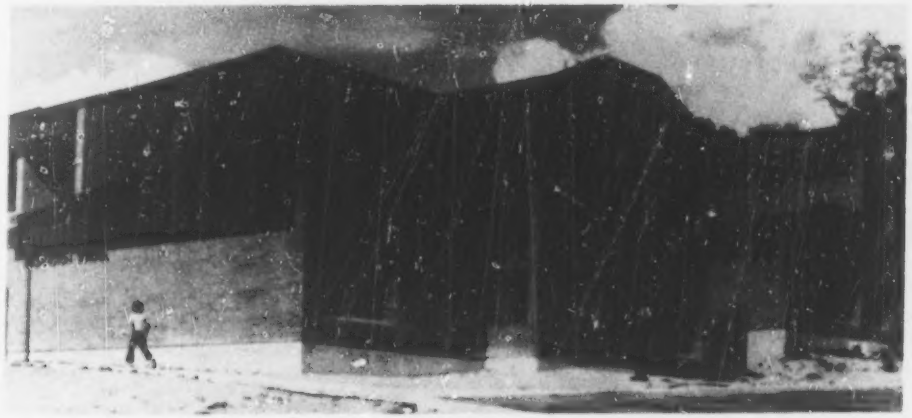
Ammendments of 1978	**Carl Perkins (1984)**
Purpose	
1. To encourage states to increase financial support to vocational training.	1. To continue and increase services to mainstream vocational services for special populations.
2. To serve target populations of disadvantaged, handicapped, and other unserved and underserved populations by providing services to get them into the mainstream of vocational education.	2. To improve vocational programs such that the trained workforce will be upgraded to serve the nation's growing need for highly trained workers.
Use of Funds	
1. All flow through funds were distributed to schools on formula.	Only funds for services to disadvantaged and handicapped to flow to schools on formula. All other funds are to be used for priorities set by the state.
2. Funds were distributed for the following purposes: • 10% Handicapped • 20% Disadvantaged • 70% Program improvement • Funds were distributed on formula that included criteria for economic need.	Funds are distributed for the following purposes: • 57% Special Needs Populations • 43% Program improvement • More than half the funds must be allocated to LEAs determined to be depressed.

PART V
OFFICE OF CURRICULUM AND INSTRUCTION

PART V
OFFICE OF CURRICULUM AND INSTRUCTION

A LONG-RANGE "BUILDING" PLAN FOR EDUCATIONAL REFORM

BRUCE GRIFFIN
Associate Superintendent



In January of 1984, the State Board of Education adopted new policies that changed the requirements for elementary and secondary programs of study. The new requirements brought about the development of a core curriculum as well as other processes for educational reform. Although much has already been accomplished, the curriculum and instruction goals of the State Board of Education have not been fully achieved. To illustrate those accomplishments for this past fiscal year, a comparison with a school building under construction has been made. As you see in this illustration, our goal is a "finished" building — one that represents the eventual achievement of *all* Board objectives.

Board goals directed at Curriculum and Instruction include:

Curriculum reform
Enhancing teaching as a profession and
Utilization of physical resources.

ADMINISTRATIVE SUPPORT FOR REFORM PROGRAMS

Administrative support is the landscaping that enhances the building: To this point, the following has been accomplished:

1. Guidelines

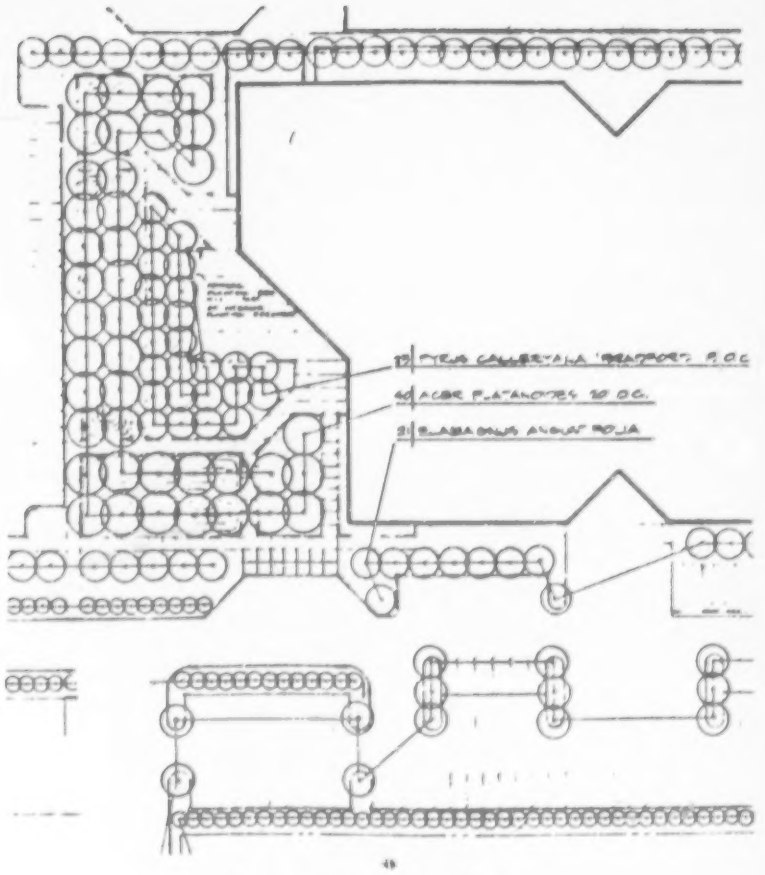
Clarified career ladder, productivity, and all other programs and project guidelines.

2. Principals Academy

Provided 27 workshops and seminars for over 900 participants. Conducted a nine month program for 41 fellows of the Academy.

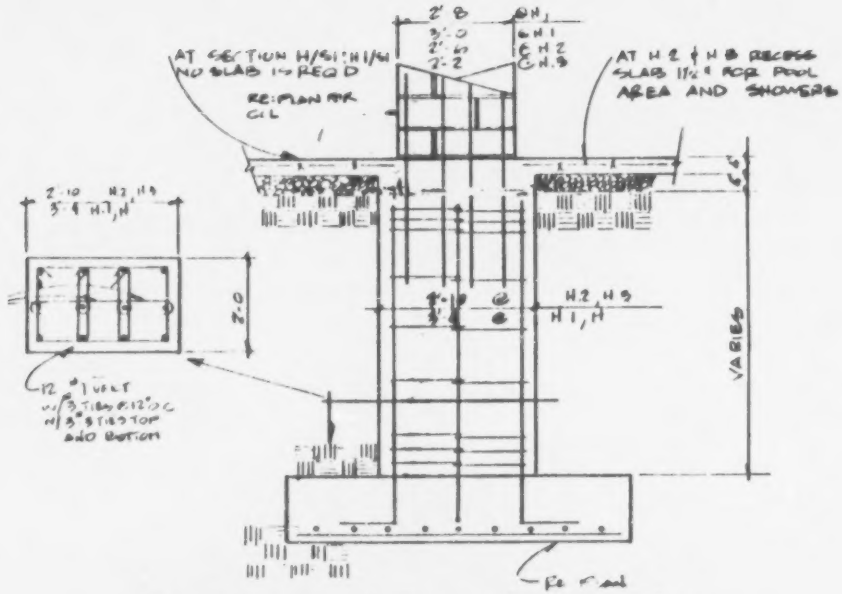
3. Professional Organizations

Led or provided liaison between the State Office and professional organizations.



Landscape Plan

THE CORE CURRICULUM

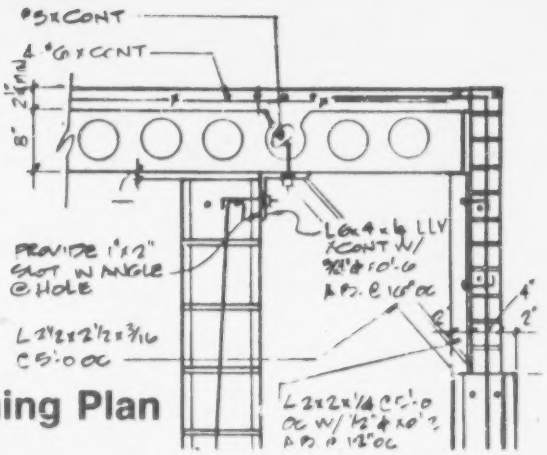


Footing and Foundation Plan

The core curriculum is the foundation of this building. To this point, the following has been accomplished:

1. Visited all 40 districts five times on the development, identification and refinement of the core curriculum standards and objectives.
2. Established the means for teachers to reorganize the integration of higher level thinking skills and processes that are part of the core and to assist them in fostering these skills in their students.
3. Renewed our focus on citizenship education in the core.
4. Prepared districts for a field trial year including strategies and instruments to collect data on the validty of the core standards and objectives.
5. Commenced integration of textbook adoptions, instructional television, and school accreditation to the core curriculum and prepared numerous newsletters for teachers and administrators to keep them informed on state and national issues.

INSERVICE AND PROFESSIONAL DEVELOPMENT



Roof Framing Plan

Inservice and professional development are the roof of the building. To this point, the following has been accomplished:

Inservice For Instruction Reform

1. Workshops

Completed over 225 workshops, conferences and seminars informing and inservicing teachers and administrators to help them better understand or teach specific areas of the new core curriculum. The meetings and workshops varied in length from a few hours to a four week duration.

2. Data Base

Developed a data base which provides all school districts access to the state approved inservice programs of Utah.

3. Certification

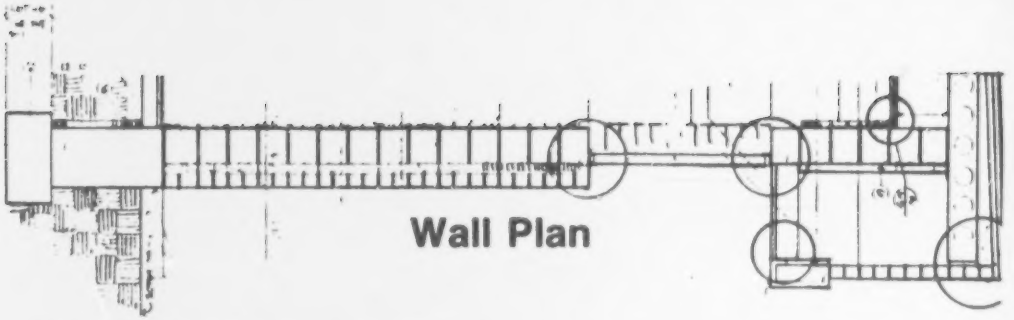
Began work on subject specific certification endorsements.

Professional Development

1. Staff

Presented numerous (50+) papers at national, regional, or state meetings. Wrote more than ten articles published in national journals. Published five book chapters. Produced over 100 projects for use in professional meetings and inservice training. Initiated a review of certification standards and conducted input sessions at eight locations throughout the state.

INSTRUCTION



Instruction is the building's walls. To this point, the following has been accomplished:

1. Outcome-Based Education (OBE)

Began implementation of the effective schools research conclusions through OBE, effective use of time studies, and the Utah High School Activities Association. OBE implementaion grants were given to 26 districts. Held three national OBE Conferences with 1800 in attendance and conducted a rural schools conference on OBE with 650 participants. Over 500 teachers were also trained in basic mastery learning techniques.

2. Productivity

Provided productivity grants that included year-round school studies in 12 districts (39 schools). Seven grants were given to implement the WANDAH Computer program for language acts in eight schools. Seven grants were also made in the area of Improved Use of Technology and five were given to the Murray School District Technology Model.

3. Assessment

Prepared a position paper on assessment of the core curriculum. Currently identifying appropriate instruments. Developing new instruments where needed.

4. Preservice

Made strides in resolving teacher pre-service problems and the need for more qualified people to seek teaching careers. The new career teaching scholarship program as enacted by the State Legislature was implemented with excellent initial results.

5. Foreign Language

Implemented a new satellite program for teaching Spanish. The project involves 27 schools in four states using a combination of accelerated learning methodology, satellite television technology, and interactive materials including computers. The project is designed to help students master speaking and writing skills at a much more rapid rate. Results of a report and study of foreign languages in Utah was discussed and studied by all district representatives. Implementation of the recommendations has begun.

COMPLEMENTARY DELIVERY SYSTEMS OF INSTRUCTION

Complementary Delivery Systems are the building's heating plan. To this point, the following has been accomplished:

1. Gifted and Talented

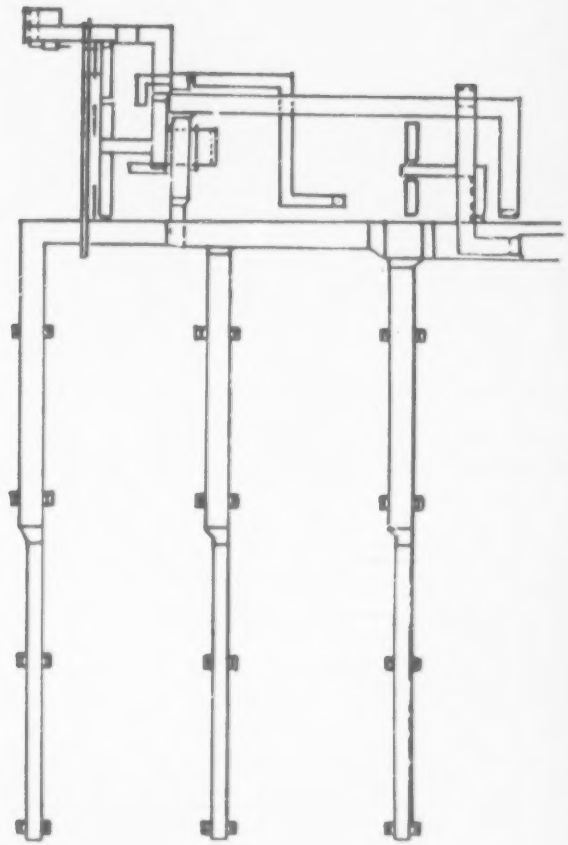
Expanded the gifted and talented programs. Increased enrollment in AP courses. Established pilot programs in concurrent enrollment with Davis District students and the University of Utah and Utah State University. Participated in and co-sponsored a teachers in training/beyond the basics program with Granite District and Utah State University to prepare teachers for the gifted and talented endorsement.

2. Adult Education

Used technology to plan, organize, manage, and implement adult education projects with an OBE emphasis.

3. Special Education

Wrote, printed, and disseminated 3000 level system manuals for funding special education, and draft revisions of state rules and regulations for programs for the handicapped. Held three workshops for the training of surrogate parents. Assisted all 40 districts and



Heating Plan

state operated programs in technical assistance. Conducted program administrative reviews in 16 districts and annual accreditation visits in two private schools.

4. The Arts

Provided summary reports on the school programs for Ballet West, Hansen Planetarium, Utah Opera Company, the Utah Symphony, and the Utah Festival of the Arts for the Young.

5. Youth in Custody

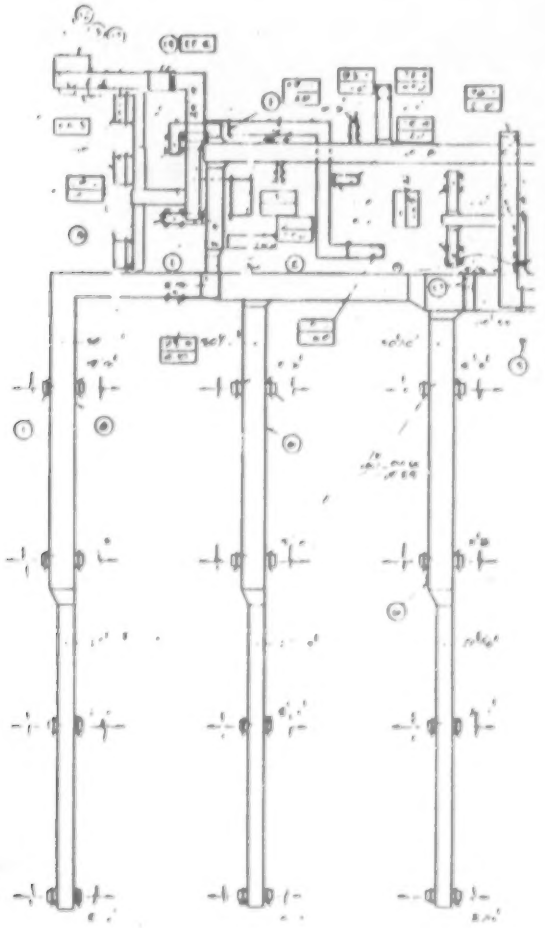
Provided workshops for all district directors in the Youth and Custody Programs to implement the core curriculum. Established a statewide electronic communications system to transport specific basic competency status of students being transferred to other Youth in Custody Programs.

6. Bilingual Education

Conducted inservice. Held conferences, and performed program evaluations.

7. Electronic Network

Established an electronic state-wide network that provides immediate on-line access to four data bases and one communication system. The data bases include: adopted textbooks, exemplary programs, inservice activities, and microcomputer education software evaluations. Electronic mail was introduced to all districts and schools with several districts adopting it as a major means of communication.



Heating Plan

PART VII — FINANCIAL SECTION AND SUMMARY

CHART II

ASSESSED VALUATION PER AVERAGE DAILY ATTENDANCE BY SCHOOL DISTRICT

1984-85

This chart illustrates the range of assessed valuations per student in average daily attendance for the 40 school districts in Utah. The districts have been ranked from high to low and show the great differences that exist between districts in their valuations. Such marked differences in assessed valuation point up the importance of equalizing educational opportunities for all children in the state. The State-Supported Minimum School Program has greatly assisted in making available equal educational opportunities in all school districts.

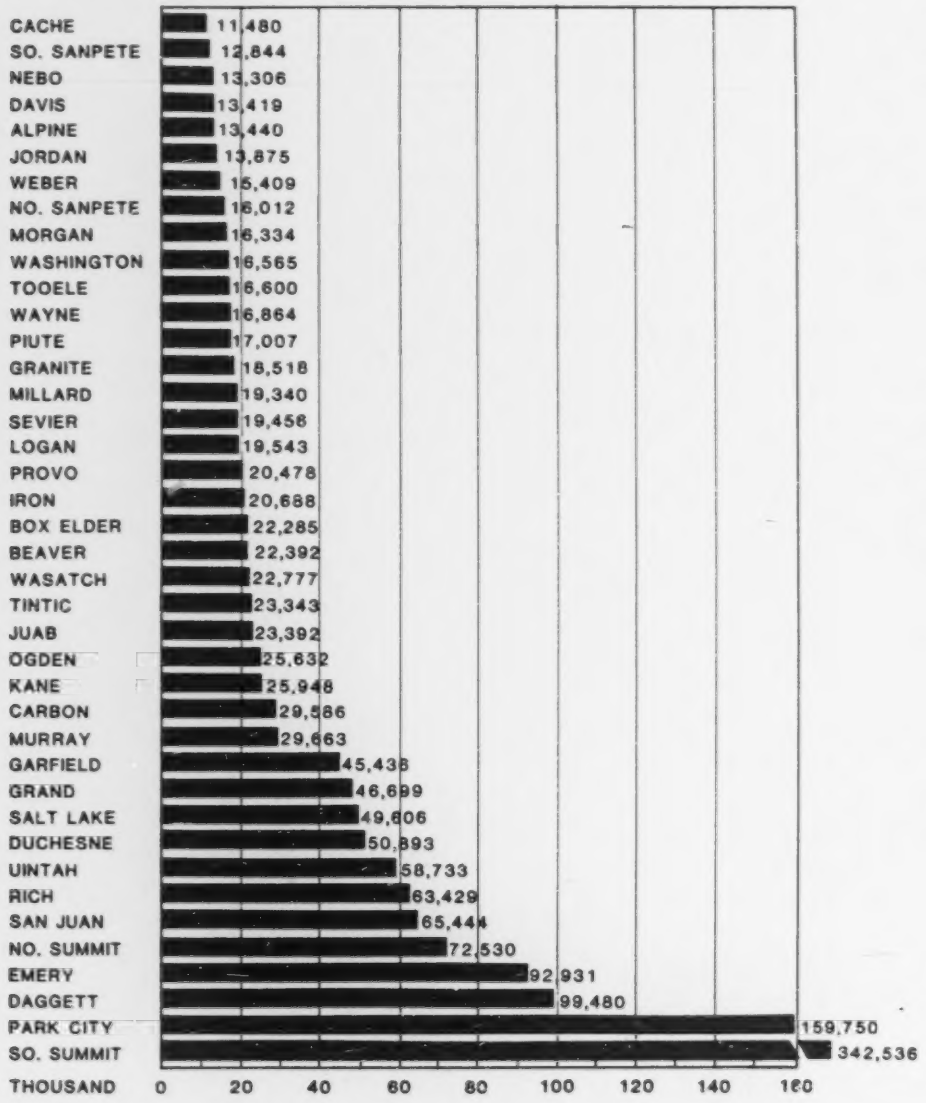

CHART III
SOURCES OF PUBLIC SCHOOL REVENUE
FOR SCHOOL DISTRICTS OF UTAH
FY 1970-85

	1969-70	1974-75	1979-80	1984-85
Local Revenue: (Taxes Fees, Misc., - Net transfers to & from other districts)	$ 84,251,836 40.59%	$134,559,819 38.25%	$258,728,579 39.89%	$ 443,810,880 42.40%
State Revenue: (Min. School Program, Transp. S.S. & Retire., Categorical Programs - School Lunch)	110,030,685 53.01%	187,113,392 53.19%	340,425,209 52.49%	541,148,851 51.70%
Federal Revenue: (Both through State and direct to District)	13,286,856 6.40%	30,142,168 8.56%	49,395,812 7.62%	61,800,629 5.90%
Total Revenue All Sources	$207,569,377 100.00%	$351,815,379 100.00%	$648,549,600 100.00%	$1,046,760,360 100.00%
Other Financing Sources (Not Inc. in above)	$ 19,542,166	$ 36,722,485	$ 85,570,391	$ 77,786,984

Note: Other financing sources includes proceeds from the sale of bonds and any other long-term borrowing, interfund transfers, proceeds from the sale of property, and fixed asset insurance adjustments.

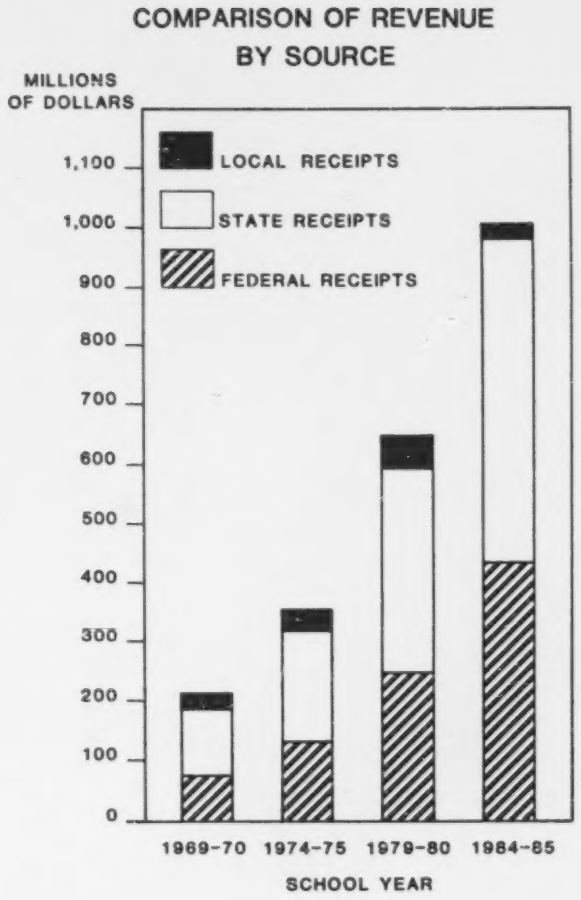

CHART IV
TOTAL ADJUSTED EXPENDITURES
FOR ALL PURPOSES FOR PUBLIC SCHOOLS OF UTAH
FY 1970-85

Purpose	1969-70	1974-75	1979-80	1984-85
Regular School Expenditures: (Includes expenditures for instruction, supporting services, and net school food services costs)	$175,339,802 80.56%	$277,427,712 75.22%	$508,533,986 70.47%	$ 840,100,827 75.69%
Capital Projects & Debt Service: (Includes expenditures for facilities acquisition and construction, bond redemption, and interest)	38,235,820 17.57%	82,369,047 22.33%	198,383,270 27.49%	257,926,420 23.23%
Community Services: (Includes expenditures for community recreation, instruction, and other services)	4,087,948 1.87%	9,049,073 2.45%	14,670,230 2.03%	11,937,481 1.08%
Total	$217,663,570 100.00%	$368,845,832 100.00%	$721,587,486 100.00%	$1,109,964,728 100.00%

Note: Regular school expenditures include costs of instruction programs and supporting services such as operation and maintenance of plant, student transportation, and administration. Also included are net school food services costs (total expenditures less local meal sales).

Capital Projects: Expenditures which result in the acquisition of land, buildings, equipment, and other fixed assets.

Debt Service: Expenditures for the redemption of bonds and for interest on indebtedness.
